Abstract	iii
Version résumée	iv
Foreword	vi
1 Introduction	1
1.1 Thesis context	1
1.2 Research Plan	2
2 Defect insensitivity in group III nitrides	4
3 Threading dislocations in group III nitrides	12
3.1 Introduction	12
3.2 Displacement, Stress and Strain fields of threading dislocations	14
3.2.1 Some reminders about the theory of linear elasticity	14
3.2.2 The Eshelby-Shockley-Read Sextic Model of straight dislocations	16
3.2.3 Applications to threading dislocations in wurtzite group III nitrides	18
3.3 Dislocations as sources of disorder	22
3.3.1 Non-radiative recombination	22
3.3.2 Stress induced compositional fluctuations	25
3.3.3 Stress induced vacancy segregation and diffusion	26
3.3.4 Pit formation at dislocation tips	27
3.3.5 Spiral growth at screw dislocations	28
3.4 Other sources of compositional disorder	31
3.4.1 Phase separation	31
3.4.2 Segregation at stacking faults	31

3.4.3	Elastic relaxation (Stranski-Krastanov mode or similar)	31
4	Lattice-matched $AlInN/GaN$: multiscale characterization	33
4.1	Introduction	33
4.2	Materials and methods	33
4.3	Thin layers (15 to 100 nm thick)	34
4.4	Intermediate layers (150 - 200 nm thick)	38
4.5	Thick layers (200 nm thick and above)	39
5	Stress modulated composition	44
5.1	Introduction	44
5.2	Theory and modeling	44
5.3	Materials and methods	47
5.4	Experimental results and calculations	48
5.4.1	Pure-edge threading dislocations	48
5.4.2	Pure-screw threading dislocations	52
5.4.3	Mixed threading dislocations	55
5.5	Discussion	61
5.6	Conclusion	63
6	Spiral growth induced disorder	65
6.1	Introduction	65
6.2	Materials and methods	65
6.3	Plan-view analysis	65
6.4	Cross-sectional analysis	69
6.5	Discussion	73
7	Stress induced vacancy segregation and diffusion	77
7.1	Introduction	77
7.2	Theory	77
7.3	Materials and methods	79
7.4	Experimental results	80

7.4.1	Lower magnification plan-view analysis	80
7.4.2	High magnification plan-view analysis	82
7.4.3	Cross-sectional study in higher growth rate samples	85
7.5	Conclusion	87
8	Cathodoluminescence of a single InGaN quantum well	88
8.1	Introduction	88
8.2	Materials and methods	88
8.3	Experimental results	94
8.3.1	Plan-view analysis	94
8.3.2	Cross-sectional analysis	102
8.4	Discussion	109
8.5	Conclusion	110
9	General discussion - Conclusion	112
	Appendix	114
A	Derivation of Equation 5.5	115
	Bibliography	117
	Acknowledgements	129
	CV	130
