

Table of Contents

1. Introduction	p8
1.1 <i>Anatomo-functional organization of the auditory system</i>	p9
1.1.a <i>The auditory system in animal models</i>	p9
1.1.a1 <i>Anatomical organization</i>	p9
1.1.a2 <i>Functional organization</i>	p10
1.1.b1 <i>The auditory system in human</i>	p11
1.1.b1 <i>Anatomical organization</i>	p11
1.1.b2 <i>Functional organization</i>	p12
1.2 <i>Dynamics of auditory processing</i>	p13
1.3 <i>Spatial discrimination: the “where” pathway</i>	p14
1.4 <i>Temporal discrimination: the “when” pathway</i>	p16
1.5 <i>Temporal order judgment (TOJ)</i>	p17
1.6 <i>Influence of pre-stimulus activity on TOJ</i>	p18
1.6.1 <i>Putative neural mechanisms underpinning TOJ</i>	p19
1.7 <i>Hemispheric specialization for TOJ</i>	p22
1.7.1 <i>Contribution of the right hemisphere in TOJ</i>	p23
1.7.2 <i>Contribution of the left hemisphere in TOJ</i>	p24
1.8 <i>Training-induced plasticity</i>	p26
1.9 <i>Main hypothesis</i>	p27
2.0 <i>“Internal brain noise” may modulate perception</i>	p28
2.1 <i>Main hypothesis</i>	p30
3. Methods	p31
3.1 <i>Electrical Neuroimaging</i>	p30
3.2 <i>Fast Fourier Transform (FFTA)</i>	p32
3.3 <i>Advantages of EEG vs. fMRI investigating TOJ</i>	p34
4. Results	p36
5. Discussion	p40
5.1 <i>Role of pre-stimulus beta oscillatory activity in TOJ accuracy</i>	p40
5.1.1 <i>Modulation of the pre-stimulus beta oscillatory activity</i>	p40
5.1.2 <i>Putative neural mechanism related to TOJ performance</i>	p41
5.2 <i>Latency of TOJ processing</i>	p43
5.3 <i>Hemispheric asymmetry in TOJ performance</i>	p45

4.3.1 Functional connectivity between left and right PSR as a function of TOJ performance	p48
5.4 Training-induced plasticity	p49
5.5 TOJ as neurorehabilitation tool	p51
5.7 "Internal brain noise" may modulate perception	p52
6. Conclusion	p55
7. References	p57
8. Articles	p68
8.1 Bernasconi et al., 2010a	
8.2 Bernasconi et al., 2010b	
8.3 Bernasconi et al., 2011a	
8.4 Bernasconi et al., 2011b
