Abstract (English/Français)	v
1 Introduction	1
1.1 State of the art	2
1.1.1 Laser beam shaping	2
1.1.2 Speckle reduction	5
1.2 Motivations and outline	7
2 Fundamentals	9
2.1 Wave propagation	9
2.2 Speckle in optics	11
2.3 Reduction of speckle contrast	13
I 1D Diffuser for Laser Beam Homogenizing	19
3 Device specifications and concept	21
3.1 Mechanical simulations	23
3.2 Optical simulations	24
4 Fabrication	27
4.1 Process flow	27
4.2 Packaged device	29
5 Characterization of the linear diffuser	31
5.1 Electromechanics	31
5.1.1 Mode shapes	31
5.1.2 Surface profile	32
5.1.3 Surface roughness	33
5.2 Optics	33
5.2.1 General results	33
5.2.2 Line generation	34
5.2.3 Application for beam homogenizing with a static diffuser	37
	ix

6	Conclusions	39
II	Scanning and Deformable Membrane for 2D Dynamic Laser Beam Shaping, Homogenizing and Speckle Reduction	41
7	Device specifications and concept	43
7.1	Concept	43
8	Optical and mechanical designs	47
8.1	Optical design and simulations	47
8.1.1	Diffusion of light	47
8.1.2	Smoothing of interferences	50
8.2	Actuation and mechanical designs	50
8.2.1	Parallel plate actuator	51
8.2.2	Clamped-clamped beam model for the membrane deflection calculation	52
8.2.3	Thickness of the membrane	54
8.2.4	Out of plane resonant comb drive actuation and spring mechanical design	55
9	Fabrication	57
9.1	Fabrication process	57
9.2	Process development	60
9.2.1	Parylene as a sacrificial layer	60
9.2.2	Parylene polishing	61
9.2.3	Lithography over high topographic region	62
9.3	Fabrication results	63
9.3.1	Packaged devices	65
9.3.2	Surface properties	65
9.3.3	Failure mode	66
10	Characterization	67
10.1	Electromechanics	67
10.1.1	Scanning stage	67
10.1.2	Deflection of the membrane	69
10.2	Optics	70
10.2.1	Light diffusion	72
10.2.2	Smoothing of interferences	74
10.2.3	Beam shaping	78
10.2.4	Speckle reduction	79
10.2.5	General optical properties	87
11	Conclusions	89

III Translating Random Phase Plate for Speckle Contrast Reduction	91
12 Presentation, design and fabrication of the device	93
12.1 Design	93
12.1.1 Random phase plate	93
12.1.2 Electro-mechanical design	93
12.1.3 Fabrication	95
13 Characterization	97
13.1 Displacement of the RPP	97
13.2 General optical results	97
13.3 Speckle reduction	98
14 Conclusions and outlook	101
General conclusions	103
Bibliography	105
Curriculum Vitae	111
