Abstract.....	v
1 Introduction	1
1.1 Global impact of tuberculosis	1
1.2 The BCG vaccine.....	2
1.3 RecA function and structure.....	3
1.3.1 Relevance of <i>recA</i> in genetic stability of vaccine strains.....	3
1.3.2 Structure of mycobacterial <i>recA</i> genes	4
1.3.3 Structure and function of mycobacterial <i>RecA</i> protein	5
1.3.4 Strategies for the generation of a gene knock-out in mycobacteria	6
1.4 Aims of the study.....	8
2 Material and Methods.....	9
2.1 Bacterial strains.....	9
2.1.1 <i>Mycobacterium bovis</i> BCG vaccine strains	9
2.1.2 <i>Escherichia coli</i> strains	10
2.2 Culture techniques	11
2.2.1 Growth media	11
2.2.2 Storage media	12
2.2.3 Cultivation.....	12
2.2.3.1 <i>E. coli</i>	12
2.2.3.2 <i>Mycobacterium bovis</i> BCG	13
2.3 Minimal inhibitory concentration assay in <i>E. coli</i>	14
2.4 Generation of electrocompetent cells and transformation.....	14
2.4.1 <i>E. coli</i>	14
2.4.2 <i>Mycobacterium bovis</i> BCG.....	15
2.4.3 Determination of transformation efficiency.....	16
2.5 Macroscopic examination of cultures.....	16
2.6 Microscopic examination of cultures	17
2.7 Molecular identification	17
2.7.1 Specific PCR for regions of difference and CRP polymorphism.....	18
2.7.1.1 RD8	18
2.7.1.2 nRD18.....	20
2.7.1.3 RD14.....	21
2.7.1.4 RDDenmark/Glaxo	22
2.7.1.5 RD2	23
2.7.1.6 RDFrappier	24
2.7.1.7 RDRussia	25

2.7.1.8	RD1	26
2.7.1.9	Mb3700/Rv3676 (cAMP receptor protein, CRP)	27
2.7.1.10	Amplification and sequencing of <i>recA</i>	28
2.8	DNA methods	28
2.8.1	Plasmid extraction from <i>E. coli</i>	28
2.8.2	Agarose gel electrophoresis and analysis	29
2.8.3	DNA purification	29
2.8.3.1	Ethanol precipitation	29
2.8.3.2	Phenol extraction	29
2.8.3.3	Gel extraction	29
2.8.4	Isolation of chromosomal DNA from <i>Mycobacterium bovis</i> BCG	30
2.8.4.1	Minimal scale DNA preparation	30
2.8.4.2	Large-scale DNA preparation	30
2.8.5	Determination of DNA concentration	30
2.8.6	Southern blot analysis	31
2.8.6.1	Blotting	31
2.8.6.2	Hybridization	31
2.8.6.3	Detection	31
2.8.7	Specific Southern analysis for the examination of the <i>recA</i> locus	32
2.9	Enzymatic manipulations of DNA	32
2.9.1	Endonucleolytic restriction digestion of plasmid DNA	32
2.9.1.1	Dephosphorylation of DNA	33
2.9.1.2	Blunting of DNA fragments	34
2.9.1.3	Ligation	34
2.10	DNA Sequencing	34
2.11	PCR primers	35
2.11.1	Basic melting temperature calculations	35
2.11.2	Salt adjusted melting temperature (T_m) calculations	35
2.11.3	Comprehensive list of primers used in this study	36
2.12	Plasmids	37
2.12.1	Plasmids used in this study	37
2.12.2	Construction of the <i>M. bovis</i> BCG $\Delta recA::3xstop$ suicide plasmid	37
2.13	PCR for generation of short hyg cassette	43
2.14	Protein methods	43
2.14.1	Preparation of cell-free extracts	43
2.14.2	Protein quantification	43
2.14.3	SDS gel electrophoresis	43
2.14.4	Western blot analysis	44
2.14.5	Buffers used for protein analyses	44
2.15	Bioinformatics	44
2.15.1	Primary databanks	44

2.15.2	Sequence analysis and plasmid maps.....	45
3	Results	47
3.1	Generation of a <i>recA</i> targeting vector.....	47
3.1.1	Vectors pBS- <i>recA</i> and pBS- <i>recA::aph</i>	47
3.1.2	Vector pGEM7- <i>recA::3xstop-hsp60-sacB-hyg-aph</i>	49
3.2	Choice and characterisation of <i>Mycobacterium bovis</i> BCG vaccine substrains.....	53
3.2.1	Choice of <i>M. bovis</i> BCG substrains	53
3.2.2	Morphology and growth.....	54
3.2.2.1	BCG Frappier (ATCC #35735).....	54
3.2.2.2	BCG Phipps (ATCC #35744).....	57
3.2.2.3	BCG Tice	58
3.2.2.4	BCG Pasteur	58
3.2.2.5	BCG Denmark 1331.....	59
3.2.2.6	BCG Russia	59
3.2.3	Molecular identification of BCG substrains	60
3.2.3.1	Regions of difference	60
3.2.3.2	Mb3700/Rv3676 (cAMP receptor protein, CRP)	67
3.3	Generation of <i>M. bovis</i> BCG <i>recA</i> mutants	68
3.3.1	Transformation efficiencies in the different BCG substrains	69
3.3.2	Transformation efficiency with suicide <i>recA</i> targeting plasmid	70
3.3.3	Selection of transformants and identification of homologous recombinants	71
3.4	Characterisation of <i>recA</i> mutants.....	72
3.4.1	Specific PCR for <i>recA</i> locus	72
3.4.2	Southern blot analysis	73
3.5	BCG Russia is a natural <i>recA</i> mutant	75
3.5.1	Genomic <i>recA</i> sequence.....	75
3.5.2	RecA expression at protein level after SOS response induction	75
4	Discussion	77
4.1	General aspects of <i>recA</i> inactivation	77
4.1.1	RecA function and supposed impact on genome evolution.....	77
4.1.2	Importance of RecA in interspecies gene exchange.....	77
4.1.3	RecA dependent virulence and <i>in vivo</i> persistence	77
4.1.4	Probable compensatory mechanisms for <i>recA</i> inactivation	78
4.2	BCG vaccine substrains.....	78
4.3	WHO vaccine production guidelines.....	79
4.4	Generation of unmarked mutants in mycobacteria.....	80
4.5	Concluding remarks and outlook.....	80
5	References	82
6	Acknowledgements.....	90
