Summary	2
Résumé	4
General introduction	6
Chapter 1:	
Strong specificity in the interaction between parasitoids and symbiont-protected hosts (<i>Journal of Evolutionary Biology</i> , in press)	13
Chapter 2:	
Ample variation but little congruence in the secondary symbiont communities of five congeneric aphid hosts	32
Chapter 3:	
Are aphid parasitoids locally adapted to the prevalence of defensive symbionts in their hosts?	55
Chapter 4:	
Experimental evolution of parasitoid infectivity on symbiont-protected hosts leads to the emergence of genotype-specificity	72
Acknowledgments	94
Curriculum vitae	95
