

Table of Contents

1. ABSTRACT 6

2. INTRODUCTION 7

 2.1. Alzheimer’s disease and semantic dementia 8

 2.2. Semantic memory.....11

 2.2.1. Semantic priming11

 2.2.1.1. Semantic priming in healthy aging 12

 2.2.1.2. Semantic priming in AD and SD 12

 2.3. Methodology12

 2.3.1. Semantic Priming paradigm13

 2.3.2. Electroencephalography (EEG)14

 2.3.2.1. Event-related potentials (ERP)..... 14

 2.3.2.2. ERPs and semantic priming 15

 2.3.3. Magnetic Resonance Imaging (MRI).....17

 2.3.3.1. Voxel-based morphometry (VBM) 18

 2.3.3.2. Arterial spin labeling (ASL) 18

 2.3.4. Combination of ASL and ERP19

 2.4. Objectives20

3. RESULTS22

 3.1. Electrophysiology and behavioral correlates of stable automatic semantic retrieval in aging22

 3.2. Topographic N400 anomaly correlates with reduced cerebral blood flow in the anterior temporal lobes of dementia patients35

4. OVERALL DISCUSSION.....62

5. PERSPECTIVE.....66

6. REFERENCES68

7. ACKNOWLEDGMENTS72

8. CURRICULUM VITAE73

9. LIST OF PUBLICATIONS.....74

 9.1. Articles submitted/published in peer-reviewed journals74

 9.2. Citable Abstracts74

10. DECLARATION OF ORIGINALITY75
