Executive Summary.....1

### Chapter 1. Cultural Gravity and Trade: Can the Pied Piper call the tune?

1. Introduction.....	4
1.1 Motivation.....	8
1.2 Case Study: Evidence in support of music as a tool of nation branding.....	8
2. The theory of cultural gravity and trade.....	10
2.1 Navigating the Gravity minefield: Gravity summarized.....	11
2.2 The empirical Gravity equation.....	12
3. Trade zeros: Trade costs of heteroscedasticity?.....	13
3.1 Potential endogeneity bias.....	15
3.2 Data.....	15
4. Main results.....	16
4.1 Sectoral analysis of the effect of music on trade.....	19
5. Identification and causality.....	22
6. Robustness checks.....	27
6.1 Analyzing the income bias.....	27
6.2 Robustness to different violations of the i.i.d assumption.....	29
6.3 Avoiding friendly “fire”: controlling for the Pied Piper’s friends.....	31
6.4 Impact of music at the national and domestic sector levels.....	32
7. Summary and discussion.....	34
8. Appendices.....	36
8.1 Appendix 1: Regression and data tables.....	36
8.2 Appendix 2: Figures.....	39
9. References.....	42

### Chapter 2. Are cultural forces more important than free trade: The Nexus between tourism, trade and culture.

1. Introduction.....	47
2. The economic importance of Jamaica’s tourism and music industries.....	48
3. Tourism demand modelling: Some a priori expectations from empirical research.....	51
4. Theoretical framework: The nexus between tourism, trade and culture.....	54
5. Empirical framework.....	58
5.1 Data and methodology.....	60
5.2 Methodological considerations.....	63
6. Empirical results and discussions.....	64
6.1 Model identification and specification.....	65
6.2 Benchmark model results.....	65
6.3 Tourist source country specific effects.....	66
6.4 The average effect of music and trade on Jamaican tourism demand.....	69
6.5 The effect of music and trade on Jamaican tourism demand at the regional level....	71
7. Sensitivity analyses.....	73
7.1 Analysis of the transportation price effects.....	73
7.2 Assessing the income bias.....	74

7.3 The impact of infrastructure, risk and relative size on Jamaican tourism.....	77
8. Summary and conclusions.....	78
9. Appendices.....	80
9.1 Appendix 1: Further details regarding the source and construction of variables.....	80
9.2 Appendix 2: Considerations and recommendations for future research.....	83
9.3 Appendix 3: Tables.....	85
9.4 Appendix 4: Figures.....	95
10. References.....	96

**Chapter 3. The impact of TRIPS on Innovation and Knowledge Spillovers within the Reggae music industry.**

1. Introduction.....	100
2. Establishing the link between copyrighted music and innovation.....	101
2.1 Criticisms of patents statistics and support for other sources of innovation.....	101
2.2 How does economics view innovation?.....	103
2.3 Innovation within the music industry: A snapshot of the music producing sector...	104
2.4 Overview of national and international copyright protection measures.....	105
3. Theory.....	105
4. Data.....	108
5. The empirical model.....	112
6. Empirical results and discussions.....	115
6.1 Benchmark regressions: Model selection and fit.....	115
6.2 Main results.....	117
6.2.1 Which firms are sure zeros?: Late entrants versus sporadic innovators.....	117
6.2.2 Identification of the copyright production function and initial evidence.....	118
6.3 Controlling for potential endogeneity bias in the stock of innovation.....	120
6.4 The direct effects of TRIPS on firm-level innovation.....	122
6.5 Assessment of the effect of TRIPS on knowledge spillovers.....	125
6.6 Robustness checks.....	126
7. Summary and conclusions.....	131
8. Appendices.....	133
8.1 Appendix 1: Count data methods.....	133
8.2 Appendix 2: Data management.....	134
8.3 Appendix 3: Figures.....	136
8.4 Appendix 4: Tables.....	139
9. References.....	142
