|------------------------|-----------|
| Abstracts | 5 |
| Foreword | 7 |
| Summary | 8 |
| Zusammenfassung | 10 |
| Résumé | 12 |
| Riassunto | 14 |

| | |
|-----------------------|-----------|
| 1 Introduction | 16 |
|-----------------------|-----------|

| | |
|-------------------|-----------|
| 2 Methods | 18 |
| 2.1 Time periods | 18 |
| 2.2 Area studied | 18 |
| 2.3 Models | 19 |
| 2.4 Data | 20 |
| 2.5 Uncertainties | 20 |

| | |
|--|-----------|
| 3 Climate change | 21 |
| 3.1 Previous observations | 21 |
| 3.2 Most recent climate scenarios | 23 |
| 3.3 Extreme events | 28 |
| 3.4 Uncertainties in the climate scenarios | 29 |

| | |
|--|-----------|
| 4 Glaciers | 30 |
| 4.1 Basic processes | 30 |
| 4.2 Changes in glaciers since the Little Ice Age | 31 |
| 4.3 Glacier retreat scenarios | 32 |
| 4.3.1 Modelling for individual glaciers | 32 |
| 4.3.2 Glacier modelling throughout Switzerland | 33 |
| 4.3.3 Findings | 33 |
| 4.3.4 Uncertainties | 37 |
| 4.4 Conclusion | 37 |

| | |
|---------------|-----------|
| 5 Snow | 39 |
|---------------|-----------|

| | |
|---|-----------|
| 6 Runoff | 43 |
| 6.1 Water cycle and water balance | 43 |
| 6.2 Seasonal distribution of runoff and changes in the future | 46 |
| 6.3 Which catchments react sensitively to climate change? | 51 |
| 6.4 Water resources and water regime | 55 |
| 6.5 Extreme runoff | 59 |
| 6.5.1 Low water | 61 |
| 6.5.2 High water | 62 |
| 6.6 Conclusion | 63 |

| | |
|--|-----------|
| 7 Water temperature | 64 |
| 7.1 Air temperature is the greatest impact factor on water temperature | 64 |
| 7.2 Water temperature in watercourses: a review | 65 |
| 7.3 Future water temperatures | 66 |

| | |
|-------------------------|-----------|
| 8 Conclusion | 68 |
| 8.1 Adaptation measures | 68 |
| 8.2 Outlook | 69 |
| 8.3 Acknowledgements | 69 |

| | |
|---------------------|-----------|
| Bibliography | 70 |
|---------------------|-----------|

| | |
|--|-----------|
| Abbreviations, figures and tables | 73 |
|--|-----------|
