Abstract	v
Résumé	vii
Introduction	1
0.1 Magnetic systems	2
0.2 Spin $S = 1$ systems and quadrupolar order	3
1 Perturbation theory on a two-orbital Hubbard model	5
1.1 Introduction	5
1.2 Two-band Hubbard model and spin $S = 1$ model	7
1.3 Degenerate perturbation theory	8
1.3.1 On-site physics	9
1.3.2 Second order results	10
1.3.3 Fourth order results	11
1.4 Discussion	14
2 Quadrupolar order and Raman scattering on spin-1 systems	19
2.1 Introduction	19
2.2 Raman scattering for magnetic systems	19
2.3 Derivation of an effective light scattering operator for spin $S = 1$ systems	21
2.3.1 Interaction of a spin $S = 1$ model with light	21
2.3.2 Second order results	23
2.3.3 Fourth order results	24
2.4 Raman spectra	27
2.4.1 How to obtain the Raman spectra	27
2.4.2 Model	27
2.4.3 Relevant limits and geometries	28
2.4.4 Results: expected spectra	29
2.5 Discussion	32
2.6 Conclusion	33
3 Spin chains with three-spin interactions	37

3.1	Introduction	37
3.2	Hamiltonian and known results	38
3.2.1	Bilinear-biquadratic quantum spin $S = 1$ chain	39
3.2.2	Quantum spin $S = 1$ chain with first and second neighbor Heisenberg interaction	40
3.3	Classical phase diagram of the $J - J_3 - J_b$ spin chain	40
3.4	Variational wave functions	42
3.4.1	Preliminary phase diagram	44
3.4.2	Intermediate phase	45
3.4.3	From the antiferromagnetic phase to the staggered phase: helical 1	45
3.4.4	From the antiferroquadrupolar phase to the staggered phase: helical 2	47
3.4.5	From the antiferroquadrupolar phase to the ferro- and anti-ferromagnetic phases: helical 3	47
3.4.6	Disappearance of the ferroquadrupolar phase	48
3.4.7	Phase diagram	48
3.4.8	Phase diagram of the $J_1 - J_{nn} - J_3$ chain	49
3.5	Generalization of the Majumdar-Ghosh point to $S > 1/2$	49
3.5.1	Spin $S = 1/2$	50
3.5.2	Spin S	53
3.6	Wess-Zumino-Witten transition	56
3.6.1	Localization of the transition	57
3.6.2	Type of transition	62
3.6.3	Intermediate conclusion	71
3.7	Magnetization curve	71
3.7.1	$\Delta S_z = 2/L$	74
3.7.2	Saturation field	75
3.7.3	Mean field magnetization curve	77
3.7.4	Phase diagram	78
4	Square lattice with three spin interactions	83
4.1	Introduction	83
4.2	Classical phase diagram	84
4.2.1	Néel phase	85
4.2.2	Up-up-down-down phase	85
4.2.3	J_3 phases	86
4.3	Mean field phase diagram	87
4.3.1	First helical phase	88
4.3.2	Second helical phase	89
4.3.3	Third helical phase	89
4.3.4	Phase diagram	89
4.4	Quantum fluctuations	89
4.4.1	The $(\pi, 0)$ phase	92

4.4.2	Correction to the energy	93
4.5	Exact diagonalizations	94
4.6	Conclusion	96
General conclusion		100
Appendix		103
A	Wess-Zumino-Witten model	103
A.1	Correlation function	103
A.2	Relevant and irrelevant operators	104
A.3	Central charge	105
B	Numerical method	109
B.1	Exact diagonalizations	109
B.1.1	Fundamentals of exact diagonalizations	109
B.1.2	Exact diagonalizations of spin $S = 1$ systems	110
B.2	The Density Matrix Renormalization Group (DMRG)	111
