

Table of Contents

Preface	v
Committee	vi
Chapter 1: Mechanical Engineering and Mechanics, Control Technologies in Manufacture and Industry	
Study on Mechanical Bearing Capacity with Tabu Search Algorithm for Multi-Vehicle and Multi-Cargo Loading Problem C.Y. Ren.....	3
Study on Aircraft Mechanics with Accessibility Appraisalment of Aviation Equipment Based on Correlation Analysis Method X.S. Gan, J.S. Duanmu and J.G. Gao	7
Study of Wirebonding Loop Formation and Influencing Factors Based on Mechanical Mechanics Q.M. Li and X. Xu.....	11
Research and Development of Clean-Energy Vehicles T.J. Yang.....	17
Study on Mechanical Properties with Effect of Super Capacitor in Energy Feedback of Electric Vehicle Battery H.X. Lou and W. Yao	22
Research on Mechanical Engineering with Innovative Design of Gantry Planer C.F. Wang and F.L. Wang.....	27
Research on Electric Vehicles with Design of Battery Test System Based on LabVIEW C. Yu and W. Yao.....	31
The Implement of CANopen in Motion Control of Electric Vehicle W. Yan and W. Yao.....	36
Anti-Surge Control of the Gas Booster in the Thermal Power Plant with Gas-Fired Boiler Y.X. Zheng.....	40
The Design and Construction of Air Intake System of a Gasoline-Natural Gas Dual Fuel Engine X.H. Liu, Z.K. Wei and J. Jiang.....	44
The Simulation Research on Air Drag Reduction of Tail Dome on Vans L.F. Cao, X.P. Xie, J.H. Zeng and H. Huang.....	48
The Design of the Dual Power Mechanical Simple Garage Lifting Platform C.F. Wang and F.L. Wang	54
Accurate Calculation about Euler Critical Force of Multistep Telescopic Cylinder with Two Different Kinds Support Conditions L. Du, P. Lan and N.L. Lu	58

Shock Test and Acceleration Analysis Methods of Marine Diesel Engines to Underwater Explosions	
J.H. Zhao, R.B. Zhang, D.B. Zhu and H.B. Gao	64
The Steady State Precision Control of DC Servo Motor Based on State Space Adaptive Pole Assignment	
J. Huang, J.F. Wang and C.Z. Yang	68
Compressing Equipment Control Method of Horizontal Preloading Domestic Waste Disposal Transfer Station and its Implementation	
H. Zhou, G.Y. Li, H.W. Bao and J.Q. Sun	72
Research on Servo Valve-Controlled Motor Velocity Control System Based on Fuzzy Control	
Y.J. Zang	77
The Digging Shovel of Corn Stubble Shop Machine Design and the Performance of Drag Reduction Test	
Y.Y. Ge, J.F. Wang, L.X. Ma and D.W. Shao	81
Study on the Correspondence of Hamiltonian Flows and Functions of Brake Hamiltonian System Based on Mechanical Mechanics	
D.W. Sun and J.R. Liu	85
Simulation of Three-Phase Motor Rotor Flux Oriented Control System Based on SVPWM	
Y.Z. Hu and S. Feng	89
Investigation on Vibro-Acoustic Characteristics from Submerged Cylindrical Shell with Double Damping Layers	
C. Zhang, D.J. Shang and Q. Li	94
Simulation Research on the Basic Platform's Automatic Leveling System Based on SimHydraulics	
Y.Q. Chen, X.H. Xu, H.L. Zhu, S.D. Ye and L.T. Li	99
Optimal Control for Three-Axle Vehicle's All-Wheel Steering	
H. Tan, S.M. Cui, K. Zhang, R.J. Sun and M.J. Lin	104
Development and Application of Portable Mining Vibration Recorder	
G.H. Xue, J. Zhang, X.D. Ji and X.Y. Zhao	108
Research on Mechanical Faults with Application of Three Order Cumulants' Coupling Features in Fault Diagnosis	
W.B. Wu and S.Q. Yang	112
Research on Mechanical Faults with Application of 1(1/2) Dimensional Spectrual Coupling Features in Fault Diagnosis	
W.B. Wu and S.Q. Yang	116
Research-Based Single Chip Microcomputer Controlling of Throttle in 09-32 Tamping Machine	
M.H. Dai, X. Feng and Y. Xu	120
Modal Analysis on Tooth Ring Plate of Three-Ring Gear Reducer	
Q.B. Huang and X. Li	124
Research on Mechanical Design with Design and Implement of High-Frequency Excitation Signal Source in Eddy Current Testing	
W.Q. Zeng, W.M. Zhang and S.H. Wang	128

Design Method for Folding Boom Structure of Elevating Platform Rescue Fire Truck	
J. Hu, Y. Ding, G.Y. Li, J. Xu and Y.F. Wang	132
Dynamics Analysis of Milling Machine Spindle	
Y.R. You, H.B. Liu and L. Gao	137
Application of Microscale Gas Leak Detection Technology on Small Pressure Vessel	
S.H. Wang, W.M. Zhang, W.Q. Zeng and T.Y. Qian.....	141
The System Design of Granular Bulk Materials Continuous Conveyor Weighing Measurement	
J.F. Zhu, S.J. Xu and Y.W. Li.....	145
Search and Doubts of the Calculation Equation of Efficiency Transmission of CLS-II Type Efficiency Transmission Gear Experiment Set	
Y. Zhao.....	150
Experiment and Research for Calculation of Efficiency Transmission of CHT-100 Type Circulating Power of the Efficiency Transmission Gear Experiment Set	
Y. Zhao.....	154

Chapter 2: Material Engineering and Processing, Applied Mechanics and Theoretical Computer Methods in Materials

Adsorption of Methylene Blue onto Char from Pyrolysis of Municipal Solid Waste	
H. Chen, C.H. Zhang and T. Wang.....	163
Molecular Dynamics Simulations of Sliding Friction of Rigid Sphere with Single Crystal Copper Surface	
X.J. Yang and X.J. Yang.....	167
Synthesis and Application of Carbon-Based Nanocomposites	
S.J. Yu, X. Han, D.W. Yu, Y.M. Chen and X.L. Wang	172
Catalytic Wet Air Oxidation of Phenol over Oxidized Activated Carbon	
G. Yang, X.Y. Liu and F.T. Wang.....	176
Surface Chemical Modification and Characterization of Nano Fe₂O₃	
Y. Liu, H.Y. Ge, X.Z. Zhang, S.F. Huang and X. Cheng	180
Research on the Concrete Performance in the Marine Environment	
Y.D. Song, J.H. Liu, F.X. Yi, B. Xu and P. Ge	184
Synthesis, Characterization, and Photoluminescence of a Novel Eu-Containing Polymer Precursor: {Tris(acetylacetonate)5-acrylamido-1,10-phenanthroline}Europium(III)	
C.J. Xu	189
Array of Fe₃O₄ Nanoparticles in PS-b-P2VP Thin Films	
X.K. Gao, J. Liu, T.H. Wang, X. Li and X.K. Zhang.....	193
Simulation of Graded Band-Gap PIN nc-Si Thin-Film Solar Cells	
M.K. Xu	197
Preparation of Mesoporous Magnetic TiO₂/CoFe₂O₄ Photocatalysts Using Ionic Liquid as Template Agent	
K. Wang, L.B. Di, L.J. Zhang, G.F. Dong and X.L. Zhang.....	201

Effect of the Pore Fractal Dimensions on Absorption Ability in Superabsorbent Fibers	
F.M. Chen, X.Z. Zhu and H.X. Yang	205
Microstructural Evolution and hardening of Subsurface of Mg-3Al-1Zn Alloy during Dry Sliding Wear	
C. Li, C. Liang, J. An and M. Yu.....	209
Experimental Investigation of Low Velocity Impact and Residual Compressive Properties of Composite Laminates Based on AE	
S. Yan, Y. Guo and X.M. Lu	214
Research on Composite Powder and Magnet Properties of Bonded NdFeB Magnets Prepared by Press Molding	
W.Z. Qin and J. He	218
Preparation Technology and Mechanical Properties of Fe-C Composites Fabricated by Plasma Activated Sintering	
G.W. Liu, C.J. Zhou, S.T. Zhao, K. Zhang, Z.G. Ye and G.J. Qiao.....	223
Experimental Study of New Rubber Plastication Method	
P. Fu	228
Theory Research on Full Metal Single Screw Pump	
B.L. Yu, J.F. Wu and Y. Yu.....	233
Analysis of Combined Support Technology with U-Shaped Steel Bracket and Anchor Bolt	
H.L. Dong, P.W. Hao, Z.H. Liu, J.P. Li and L.W. Jing.....	238
Experimental Investigation on Refill Friction Stir Spot Welding Process of Aluminum Alloys	
H.G. Yang and H.J. Yang	243
Multidispersion Soot Interference Mechanism on SO₂ Concentration Using NDIR	
Y.J. Zhao, S.G. Cheng and B. Qu.....	247
Monodispersion Soot Particle Interference on NO₂ Concentration Measurement Accuracy Using NDIR	
Y.J. Zhao, S.G. Cheng and B. Qu.....	251
Interference Mechanism on NO₂ Concentration by the Multidispersion Soot Using NDIR	
Y.J. Zhao, S.G. Cheng and B. Qu.....	255
Research on Residual Stress of Engineering Ceramic Grinding Surface	
W.X. Liu	259
The Material Discontinuous Zone Influence on the Behavior of Crack Propagation in the Matrix Material	
Z.J. Sun and Y.T. Li.....	263
Consistent Mode Mixity for the Interface Crack of the Bimaterial Disc under Diametric Compression Loading	
Z.J. Sun, Y.T. Li and H.Y. Duan	268
Application of ANN Back-Propagation for Fracture Design Parameters of Middle Carbon Steel in Extra-Low Cycle Bend Torsion Loading	
H.Y. Duan, Y.T. Li, Z.J. Sun and Y.Y. Zhang	272

Study on Electromagnetic Shielding Material Performance Based on the Status of the Test Method	
W.P. Xiong, L.G. Wang and X. Zhou.....	277
Modeling of Engineering Ceramics Grinding Surface Residual Stress	
W.X. Liu	281
Optimum Design of Curvilinear Stiffened Panels with Stiffening Beams	
J.B. Yang, B.F. Song and X.P. Zhong	285
Experimental Investigation of Tensile Damage Mechanisms on 3-D Braided Composites with AE	
S. Yan, L.L. Jiang and D.H. Li	290
Research Progress in Mechanics of Hollow Section RC Bridge Piers Subjected to Seismic Dynamic Load	
Y. Zhao, J. Gu and H.G. Wu.....	294
Theoretical Study on Reactivity of Fe-Based Oxygen Carrier with CH₄ during Chemical Looping Combustion	
L. Wang, L.N. Wu, C.Q. Dong, J.J. Zhang and W. Qin	298
Structure Analysis of the Large Bridge-Craft Using Finite Element Method Based on Properties of Engineering Materials and Mechanical Mechanics	
S.L. Qing, Y.L. Chen and P. Xia	302
Deformation Behavior and Dynamic Stress Response of High Railway Embankment under Cyclic Load	
Y.L. Du, Y.L. Lin and G.L. Yang.....	306
Numerical Simulation of Residual Stress Field Induced by Water-Jet Cavitation Peening	
B. Han, Y.H. Wang and C.L. Xu	312
Stability Analysis for Horizontal Boom with Double Pulling Rods under Non-Conservative Forces	
S.R. Wen, P. Lan and N.L. Lu	316
Elastic-Plastic Deformation of Milling Thin Wall Part	
A.J. Tang, H.L. Ma and Z.Q. Liu.....	321
Numerical Computation Studies and Hydrodynamic Analysis on the Cutting-Carrying and Lifting Capacity of Spiral Centralizer in Gas Drilling	
Z.M. Chen, H.L. Xu and J.Y. Xiong.....	325
Research on Fluid Mechanics with the Finite Analytic/Grid Method for Two-Phase Turbulence Based on PDF Theory	
W.W. Ye, J.R. Xu, S.J. Hu and Y. Tian.....	331
Fluid Dynamic Simulation of a Wall-Jet-Flow Loaded with Solid Particles Using the Finite Analytic/Grid Method of PDF Model	
Y. Tian, J.R. Xu, S.J. Hu and W.W. Ye.....	336
Static Instability of a Restrained Cantilever Column with a Tip Mass Subjected to a Subtangential Follower Force	
Z.C. Su and Y.X. Xue	341
Flow-Induced Noise Radiation from the Rotational Bodies Based on Fluid Mechanics Using Hybrid Immersed Boundary Lattice-Boltzmann/FW-H Method	
L. Chen, Y. Yu and G.X. Hou.....	345

Numerical Simulation of Filling Process in Casting Based on a Hybrid Lattice Boltzmann and Particle Level Set Model	
Y. Yu, L. Chen, J.H. Lu and G.X. Hou.....	349
Chapter 3: Industry Technologies and Application	
Study on Electronic Industry with an Application of Rectilinear Embedding in VLSI Placement	
L.Y. Pan and Y.P. Liu.....	355
Research on Photovoltaic Industry with the MPPT Algorithm in PV System	
S.D. Shen and W. Yao	359
Research and Design of Temperature Monitoring System in Industry Applications Based on PLC	
X. Zhang.....	364
GARCHSK Based Risk Assessment in Electric Power Industry	
R.Q. Wang and Z.Q. Xiao.....	368
Simulation Analysis on Industrial Wastewater Adjust Pool Stench in Collecting Hood with Properties of Environmental Materials	
Z. Du, J. Han, B. Guo and S.Z. Meng.....	372
Research on Petrochemical Industry with Analysis of Floating Roof Tanks under the Planar Inclined Foundation	
L.X. Wei, X.Y. Li and D.W. Ji	376
Study on the Sustainable Development Evaluation of Logistics Enterprise for Industry Manufacturing Based on Data Envelopment Analysis	
S.L. Li	380
Study on the Model of Quantitative Evaluation of Circular Economy Development for Industry Manufacturing Based on WIOA	
S.L. Li	384
Study on Formative Industry Design with Trace to Source of Formative Thinking	
Y.Q. Wang, S.H. Li and H.H. Xu	388
Study on Formative Industry Design with the Impact of Gestalt Psychology on Modeling Cognitive	
Y.Q. Wang, H.H. Xu and F.Y. Chen	392
Intelligence Based Control Strategy of Forming Process for Plastic & Rubber Products	
P. Tao, Q. Wu and C. Xiao	396
Research on the Measuring of the Order of Eco-Industrial Chains for Recycling Waste Material Based on the Theory of Dissipative Structure	
J.H. Li and W.W. Yu	400
Research on Mechanical Operation with Sequencing Optimization of Arrival Aircraft in Terminal Area	
Y. Liao and N. Zhai	404
Online Scheduling with Incompatible Job Families on Batch Processing Machine(s)	
L.L. Liu.....	408

Mechanical and Electrical Integration of Workpiece Transfer System G.Z. Cheng and S.F. Ge	412
Research on Mechanical Design with Beidou GPS Navigation Antenna Design Terminal G.Z. Chen, G.T. Chen, J. Sun and J. Miao	416
Research on Development Potential of the New Energy Industry Based on Fuzzy Comprehensive Evaluation S.M. Yang	421
The Focusing Mechanism Design for Laser Anti-Counterfeit Platform in Production Manufacturing Engineering R. Tian	425
The Modal Analysis of Focusing Mechanism for Laser Anti-Counterfeit Platform in Production Manufacturing Engineering R. Tian	429
Research on Food Processing Engineering with an Inventory Model for Foodstuffs with Service Level D.G. Xu, M. Xue and C. Qiu	434
A Hybrid Ant Colony Optimization Algorithm for Permutation Flow-Shop Scheduling in Manufacturing Systems and Industrial Process J. Chen, X.X. Zhang and Y.Y. Ma	438
Brief Analysis of Floor Grouting Method in Soft Rock Roadway Based on Engineering Materials and Engineering Mechanics P.W. Hao, H.L. Dong, Z.H. Liu, J.P. Li and L.W. Jing	442
New Technology and Mechanism Study of the Bearing Enhancement of Broken Rock Zone in Underground Rock Roadway P.W. Hao, H.L. Dong, Z.H. Liu, J.P. Li and L.W. Jing	447
Simulation and Analysis for the Rocket Gas Flow Field Based on Mechanical Mechanics and Mechanical Properties Y. Zhang, Y. Jiang and X.T. Dong	455
Study on Machinery and Electronics Engineering with Analysis and Modeling on Electromagnetic Environment Based on Radio Seeker Penetrating Process H. Liu, L.N. Hong, J.A. Yang and Y. Wang	459
Experimental Study of Resonant Frequency Tunable Piezoelectric Energy Harvester X.Y. Zhang, J.W. Kan, D.L. Liu and S.Y. Wang	463
 Chapter 4: Manufacturing Engineering and Manufacture Automation	
Study on Bicycle Manufacturing Engineering with the Quality Detection Device for the Carbon Fiber Sports Bicycle P.H. Liu and Y.B. Zhang	469
Study on Manufacturing Engineering with Supply Chain Profit Model of Fast Moving Consumer Goods Based on TOC Operation Mode S.W. Ji, C.C. Li and J.J. Chen	473

Modeling and Analysis of the Discrete Manufacturing Product Quality with Information Formation Process for Traceability	
X.X. Zhao, L. Zhao, Z.X. Hu and C.L. Zhou	477
Manufacturing Process Design Based on Mental and Physical Workload Analysis	
Q.G. Ma, X.L. Sun, H.J. Fu, D.C. Zhao and J.F. Guo	482
Multi-Objective Optimization in Manufacturing Engineering for Slender Pen Rod Injection Molding Quality Based on Grey Correlation	
X.H. Tan, L.G. Wang and W.S. Wang	486
Digital Research on Oblique Cutting Parameters of Round Broach	
Y. Wang, S. Chen and M. Wang	494
Mechanical Automation of Rice Transplanting and Key Agronomic Techniques	
L.Y. Zhang, Z.X. Zhang, Q.Y. Li, J.P. Yao, R.H. Li, X. Zhang and C.B. Liang	498
The Stress Distribution Analysis of Spiral-Wound Heat Exchanger	
X.D. Hu, Z.X. Chi, Y.J. Li, Y. Zhang and Z. Qi	502
A Model of Weight Absolute Grey Correlation Degree for the Transformer Bushing State Assessment	
R. Gu, J.S. Yuan and F. Lv	507
Research of Mechanical System on Rotary Steering Drilling Tool	
W.H. Yan, Y. Peng, S.H. Zhang and H. Wu	511
Reliability Research on Measurement System for Downhole Storage Pressure Gauge	
H. Wu, Y. Peng and L.P. Wang	516
Influence of Three-Dimensional Stability Lobes on the Cutter Design	
A.J. Tang, H.L. Ma and Z.Q. Liu	521
Static Analysis on the Measurement System of an Electronic Belt Scale	
H. Gan, K. Chen and X.H. Zhong	525
Design of Two-Welding Torch Automatic Welding Machine	
J.T. Liu, J.G. Yi and H.Y. Jiang	530
The Analysis of the Automatic Steel Drum Tilter	
X.G. Yu, C. Tan and G.B. Liao	534
Identification of Toolholder-Spindle Joint Based on Receptance Coupling Substructure Analysis	
L.J. Zhai, X.L. Song and L.G. Cai	539
The Semi-Automatic Drilling Machine for Flange Processing	
Y.T. Mei and G.Z. Cheng	543
Research on Decision Support System of Relay Protection Equipment Status Evaluation Based on Mechanical Overhaul	
Y.T. Zhou, Y. Wu and T. Zuo	547
The Finite Analysis and Optimization of Gantry Beam on Automatic Welder	
Q.H. Li, W.S. Tang and Y.Q. Hou	553
Finite Element Analysis of the Frame of Straightening Machine with Twelve Rolls for Tubes	
B.S. Zhang, J.C. Song and G.A. Ren	557
Optimization Design Method for Body Frame of Vehicular Glass Edge Grinding Machine Based on Goal-Driven Optimization	
J. Hu, Z.J. Wang, B. Duan and G.Y. Li	561

Dynamic Analysis of Scratch System of Grating Ruling Machine B. Chu, Y. Shen, Y. Jin and C.A. Zhu	566
Experimental Investigation on a Heat Recovery Device Installed on Cement Rotary Kiln K. Wang, W.J. Du and L. Cheng	572
Research on Removal Equipment for Industrial Dust Emissions with the Finite Element Method for the Manner of Filter Board and Filter Bag Layout X.G. Yu and J. Chen	576
Analysis on Gas Flow Field in Bell-Type Annealing Furnace by Using FLUENT W.D. Qi, J.C. Song and G.A. Ren.....	581
Optimization of Injection Molding Process Parameters with Material Properties Based on GA and BP X.H. Tan, L.G. Wang and W.S. Wang	586
Keyword Index	591
Author Index	597
