Abstract v

Zusammenfassung viii

1 Introduction **1**

1.1 Neurological Motor Rehabilitation 1

1.1.1 Robot-Aided Motor Rehabilitation 2

1.1.2 Motivation & Engagement 3

1.1.3 Movement Feedback 4

1.2 Augmented Feedback Exercises & Virtual Reality 5

1.2.1 Augmented Feedback during Motor Rehabilitation 7

1.2.2 Drawback of today's approaches 7

1.3 Characteristics of Video Games 9

1.4 The Flow Theory 11

1.4.1 Flow and Video Game Entertainment 12

1.5 Flow and Augmented Feedback Exercises 14

1.6 Thesis Aims 16

1.7 Structure 17

Zimmerli, Lukas 1983-
Increasing engagement during robot-aided motor ...

Schweizerischen Nationalbibliothek

2 Augmented Feedback Exercises during Motor Rehabilitation 19

2.1 Overview 19

2.2 Methods 20

2.2.1 System Setup 20

2.2.2 Robotic Gait Orthosis 20

2.2.3 Augmented Feedback Exercise 22

2.2.4 Movement Metaphor 23

2.2.5 Subjects 25

2.2.6 Study Design 25

2.3 Results 26

2.3.1 Feedback from Patients 26

2.3.2 Feedback from Therapists 26

2.4 Discussion 28

2.4.1 Movement Feedback 29

2.4.2 Graphics 29

2.4.3 Study Limitations 30

2.5 Conclusion 30

2.6 Contribution 31

3 Adapting Augmented Feedback Exercises to Patient Capabilities 33

3.1 Overview 33

3.1.1 Fitts' Law 34

3.2 Methods 35

3.2.1 Weight compensation system 35

3.2.2 Augmented Feedback Exercise 37
3.2.3 Subjects 38
3.2.4 Study Design 39
3.2.5 Movement Measurements 41
3.2.6 Questionnaire 42
3.2.7 Data Acquisition & Analysis 43
3.3 Results 43
3.3.1 Fitts' Law 43
3.3.2 Successful Trials 44
3.3.3 Movement Speed 45
3.3.4 Hand-Closing Time 45
3.3.5 Reaction Time 46
3.3.6 Hand-Path Ratio 47
3.3.7 NASA-TLX 48
3.4 Discussion 49
3.4.1 Outcome Perception & Performance 50
3.4.2 Study Limitations 51
3.4.3 Graphics 52
3.5 Conclusion 52
3.6 Contribution 53

4 Increasing Engagement using Augmented Feedback Exercises 55

4.1 Overview 55
4.2 Methods 56

4.2.1 Robotic Gait Orthosis 56
4.2.2 Augmented Feedback Exercises 56
4.2.3 Virtual Speed Mapping 59
4.2.4 Subjects 60
4.2.5 Study Design 63
4.2.6 Measurements 63
4.2.7 Data Acquisition & Analysis 64
4.3 Results 65
4.3.1 Heart Rate 65
4.3.2 EMG - Biceps Femoris 66
4.3.3 EMG - Gastrocnemius Medialis 67
4.3.4 EMG - Rectus Femoris 68
4.3.5 EMG - Tibialis Anterior 68
4.4 Discussion 71
4.4.1 Study Limitations 73
4.4.2 Graphics 74
4.5 Conclusion 75
4.6 Contribution 75

5 Conclusion & Outlook **77**

5.1 Conclusion 77
5.1.1 Augmented Feedback Exercises & Patient Engagement 78
5.1.2 Design Characteristics for Augmented Feedback Exercises . . . 79
5.1.3 Difficulty Adaptation using Fitts' Law 80

5.2 Outlook 80
