Table of Contents

Summary i

Zusammenfassung v

List of Abbreviations viii

1 Introduction 1

1.1 Positron Emission Tomography (PET) 1

1.1.1 Annihilation and its Implications for PET 1

1.1.2 Photon Detection 2

1.1.3 Image Reconstruction and Correction Steps 4

1.1.4 Tracer strategies in PET 5

1.1.5 Receptor and Transporter Targeting 5

1.1.6 Radiolabeled Enzyme Substrates 6

1.1.7 Radiolabeled Hexoses, Lactate, Acetate and Pyruvate 6

1.1.8 ^{15}O-based PET agents: ^{15}O, ^{11}CO, ^{15}OC, ^{15}OCO, and $H_2{}^{15}O$ 7

1.2. ^{1}H Magnetic Resonance Spectroscopy 7

1.2.1 Proton Spins in the Magnetic Field 7

1.2.2 Spin Excitation and Relaxation 9

1.2.3 The magnetic resonance spectroscopy signal 10

1.2.4 Chemical Shift 12

1.2.5 Quantification of the Spectrum and Glucose in Particular 13

1.2.6 ^{1}H Magnetic Resonance Spectroscopic Imaging 15

1.2.7 The SPECIAL Sequence 16

1.2.8 Glucose Measurement with ^{13}C Spectroscopy 16

1.3. Glucose Transporters and Hexokinases 17

1.3.1 GLUT1 17

1.3.2 GLUT2 18

1.3.3 GLUT3 18

1.3.4 GLUT4, 5, 6 and 8, HMIT 19

1.3.5 Hexokinases 19

1.4. Kinetic Modeling 19

1.4.1 The Two Tissue-Compartment Model for FDG PET 20

1.4.2 Patlak Plots of FDG PET Data 22

1.4.3 Michaelis-Menten Kinetics Applied to ^{1}H Spectroscopy Data 23

Alf, Malte Frederick
Quantitative and reproducible measurement of brain ...
2013

Schweizerischen Nationalbibliothek

1.5 Previous Quantifications of Brain Glucose Consumption 24
1.5.1 Early, Invasive Studies of CMR_{glc} 25
1.5.2 Quantification of CMR_{glc} with ^{13}C MRS 25
1.5.3 Quantification of CMR_{glc} with ^{1}H MRS 25
1.5.4 Quantification of CMR_{glc} with Labeled Deoxyglucose 26
1.6 Challenges to Overcome in this Work 27
1.7 Aims of the Thesis 28
2 FDG Kinetics: Data Treatment 29
2.1 Abstract 30
2.2 Introduction 31
2.3 Results 33
2.3.1 Influence of the infusion protocol 33
2.3.2 Fractional blood volume 34
2.3.3 Data smoothing 36
2.3.4 Sample timing and calibration errors 36
2.4 Discussion 37
2.5 Conclusions 39
2.6 Methods 40
2.6.1 Data acquisition and kinetic modeling 40
2.6.2 Simulation of TACs with different infusion protocols 40
2.6.3 Sampling rate and smoothing 41
2.6.4 Blood volume and sample properties 41
2.6.5 Data normalization and statistical tests 42
3. Real-time input function in mice 43
3.1 Abstract 44
3.2 Introduction 45
3.3 Results 46
3.3.1 Input Functions 46
3.3.2 Compartment Modeling of ^{18}F-FDG Uptake in the Brain 48
3.3.3 Patlak Analysis 50
3.3.4 Influence of the Type of IF on the Goodness-of-Fit 51
3.4 Discussion 52
3.5 Conclusion 54
3.6 Materials and Methods 54
3.6.1 Animal Preparation 54

3.6.2 Data Acquisition 55
3.6.3 Image Analysis 56
3.6.4 Shunt/Coincidence Counter Input Function 57
3.6.5 Image-Derived Input Function 57
3.6.6 Kinetic Modeling 58
3.6.7 Statistical Analysis 58
4. Brain response to hypoglycemia 61
4.1 Abstract 62
4.2 Introduction 63
4.3 Results 64
4.3.1 Transport and metabolic rate constants 65
4.3.2 Estimation of CMR_{glc} and transport 67
4.3.3 ROI Analysis 67
4.4 Discussion 68
4.4.1 Cerebral Metabolic Rate of Glucose and Lumped Constant 68
4.4.2 Changes in Transport and Phosphorylation Rates 69
4.4.3 Regional specificity of kinetic parameters 70
4.4.4 Influence of Insulin 71
4.4.5 The Role of k_2 71
4.5 Conclusions 71
4.6 Materials and Methods 71
4.6.1 Animal Preparation 71
4.6.2 Insulin infusion and blood sampling 72
4.6.3 Imaging 72
4.6.4 Kinetic modeling 73
4.6.5 Lumped Constant 73
4.6.6 Region of Interest Analysis and Statistics 74
4.7 Acknowledgements 75
5. MRS glucose mapping and PET joining forces 77
5.1 Abstract 78
5.2 Introduction 79
5.3 Results 81
5.3.1 PET kinetic modeling 81
5.3.2 Parameters from MRSI 82
5.3.3 Estimation of the LC from combined PET/MRSI data 83

5.4 Discussion 84
5.5 Conclusion 86
5.6 Methods & Materials 86
5.6.1 Animal preparation 86
5.6.2 PET Imaging 87
5.6.3 MR Spectroscopic Imaging 87
5.6.4 Data Analysis 88
6 Conclusions and Perspectives 91
6.1 Impact of and Conclusions from this Work 91
6.2 Development in Brain PET in General 92
6.3 Potential Applications to Disease Models 93
6.4 Future Work with Hybrid PET/MR 93
6.5 Further Multimodal Studies 94
7 Bibliography 97
7 Bibliography 97
Acknowledgements 111
Academic Curriculum Vitae 113
