

Contents

Abstract	i
Zusammenfassung	iii
Contents	v
1 Introduction	1
1.1.1 Polyarylenes	1
1.2 Kinked Polyphenylenes	5
1.3 Suzuki-Miyaura Reaction and Suzuki-Polycondensation	9
1.4 Catalysts.....	11
1.4.1 Precatalysts	13
1.4.2 Catalyst Removal	14
1.5 Side Reactions	15
1.5.1 Homocoupling.....	15
1.5.2 Ligand Scrambling	17
1.5.3 Deboronation	18
1.5.4 Dehalogenation.....	19
1.6 Analysis of Polymers by Mass Spectrometry	19
2 Aim of the Work	25
3 Monomer Synthesis and Polymerization	27
3.1 Monomers with Various Side Chains	27
3.2 Derivatization of Arylboronic Acid.....	30
3.3 Optimization of SPC Conditions	33
3.3.1 SPC Using Monomers with Different Boron Groups	33
3.3.2 SPC Using Monomers with Different Side Chains	34
3.3.3 SPC with Different Bases.....	36
3.4 Structural Analysis of SPC Products	37
3.5 Suppression of Cyclization and Other Side Reactions towards High Molar Mass ...	40
3.6 Monomer Addition Rate	42
3.7 Reaction Temperature.....	43
3.8 Catalyst Concentration	44

3.9	Thermogravimetric Analysis	45
3.10	Differential Scanning Calorimetry	48
3.11	Optical Spectroscopy Measurement	49
3.12	Fluorescence Measurements	50
3.13	Mechanistic Investigations	51
3.14	Initiated Polymerization	53
3.15	Initiator Concentration	56
3.16	Di-Endfunctionalized Polymers	57
3.17	Investigation of Chain Directionality	58
3.18	Conclusions	60
4	Block Copolymerization	63
4.1	Sequential Polymerization	63
4.2	Structural Analysis	65
4.3	Conclusions	70
5	Endfunctionalization with Terpyridinyl Units	71
5.1	Synthesis of Polymers Carrying a Terpyridine Unit	72
5.2	Supramolecular Polymers Containing Metal Bis-Terpyridine Complexes	75
5.3	Conclusions	78
6	Preliminary Investigations of Secondary Structure Formation of PMPs.....	79
6.1	Foldamers	79
6.2	Deprotected PMP for Foldamer Formation	80
6.3	Conclusions	82
7	Conclusions and Outlook	83
7.1	Summary and Conclusions	83
7.2	Outlook	84
8	Materials and Methods	87
8.1	General	87
8.1.1	Reagents	87
8.1.2	Column Chromatography	87
8.1.3	NMR	87
8.1.4	Mass Spectrometry	87
8.1.5	Analytical GPC	88

8.1.6	Preparative GPC.....	88
8.1.7	UV/Vis Spectrometry.....	88
8.1.8	Fluorescence Spectrometry.....	88
8.1.9	CD spectroscopy.....	88
8.1.10	Single Crystal X-Ray Crystallography.....	88
8.1.11	Melting Points.....	88
8.1.12	Thermogravimetric Analysis.....	89
8.1.13	Differential Scanning Calorimetry.....	89
8.1.14	Slow Addition.....	89
8.2	Procedures for Monomer Synthesis.....	90
8.3	Procedures for Suzuki-Polycondensation.....	105
9	Appendix.....	109
9.1	Abbreviations and Symbols.....	109
9.2	Crystallographic Data of compound 6a.....	111
10	References.....	115
	Acknowledgment.....	123
	Publications.....	125
	Curriculum Vitae.....	127
