Acknowledgements	i
Abstract	iii
Zusammenfassung	v
1. Introduction	5
1.1 What Is the Goal of Sensory Coding	6
1.2 The Zebra Finch	8
1.2.1 The Vocalization of a Zebra Finch	9
2. Characterization of a Neuronal Sensory System	15
2.1 Response Strength, z-Score and Selectivity	15
2.2 Receptive Fields	17
2.2.1 Time-Frequency Representation of Sound	17
2.2.2 Receptive Field Estimation	22
2.2.3 Spectral-Temporal Receptive Fields	24
2.2.4 Ensemble Modulation Transfer Function	25

3. The Auditory System of Songbirds	27
3.1 From the Mechanosensory System to the Thalamus	29
3.1.1 Middle Ear	29
3.1.2 Cochlear Duct	30
3.1.3 Cochlear Nerve	30
3.1.4 Hindbrain Nuclei	31
3.1.5 Midbrain - MLd	33
3.1.6 Thalamus - Nucleus Ovoidalis	34
3.2 Primary Auditory Cortical Nucleus - Field L	35
3.3 Secondary Auditory Cortical Nuclei	38
3.3.1 NCM	38
3.3.2 CM	39
3.4 Tertiary Auditory (Premotor) Cortical Nuclei	41
3.4.1 Nif	41
3.4.2 HVC	42
3.4.3 Av	46
3.5 Auditory Responses in Other Areas	46
3.5.1 Premotor Nuclei and the Anterior Forbrain Pathway	46
3.5.2 HVC Shelf and RA Cup	48
3.5.3 MMAN and VTA	48
4. A New Nonsymmetric Sparse Coding Algorithm	51
4.1 Independent Component Analysis	52
4.1.1 Contrast Function	53
4.1.2 Optimization Algorithms	54
4.2 Sparse Coding	56
4.3 A New Nonsymmetric Sparse Coding Algorithm	58

4.3.1	Zero-Threshold Algorithm	61
4.3.2	Non-Zero Threshold	65
4.3.3	Overcomplete Representation	66
4.3.4	Low-Density Receptive Fields	67
4.3.5	Inclusion of Temporal Features	68
4.3.6	Reconstruction Error and Decoding	68
5.	Sensory Modeling Using Nonsymmetric Sparse Coding .	73
5.1	An Overview over Sensory Modeling	73
5.2	The Model	76
5.3	Results	78
5.3.1	Spectral-Temporal Receptive Fields and Ensemble Modulation Transfer Functions	78
5.3.2	Synaptic Currents and Firing Rates	86
5.3.3	What Has Been Encoded	89
5.3.4	Selectivity and Sparseness	92
5.3.5	Multilayer Networks	95
6.	Nonsymmetric Sparse Coding as a Computational Tool	97
6.1	Sparse Coding Used for Subsong Detection	98
6.1.1	Training of the Detector	98
6.2	Tracking Song Development	102
6.3	Smart Noise Suppression by Selective Neuron Exclusion . .	106
6.4	Underdetermined Blind Source Separation of Zebra Finch Songs	107
7.	Discussion	113
7.1	A New Model?	113

7.1.1	Song Selective Neurons in the Auditory Forebrain	114
7.1.2	STRFs and Their Relation to Spike Responses	115
7.1.3	Function of Selectivity Reversal	116
7.1.4	Applicability to Other Sensory Modalities	117
7.1.5	HVC and Song Learning	118
7.1.6	The Algorithm from an Engineering Viewpoint	119
7.2	Conclusion	120
Appendix A. List of Variables and Functions		121
Appendix B. List of Abbreviations		127
Bibliography		131
