Foreword	ix
-----------------------	----

Thibault Damour

Time and Relativity

1 Introduction	1
2 The common conception of Time	3
3 Boltzmann and the first time revolution	4
4 Einstein, Special Relativity and Time	8
5 General Relativity and Time	9
6 Relativistic Gravity and the Second Law	11
7 Primordial cosmology and the Second Law	14
References	16

Cédric Villani

(Ir)reversibility and Entropy

1 Newton's inaccessible realm	20
2 The entropic world	25
3 Order and chaos	29
4 Chaotic equations	33
5 Boltzmann's theorem H	42
6 Entropic convergence: forced march to oblivion	46
7 Isentropic relaxation: living with ones memories	55
8 Weak dissipation	64
9 Metastatistics	66
10 Paradoxes lost	67
References	73

Cédric Villani

(Ir)réversibilité et entropie

1 Le royaume inaccessible de Newton	82
2 Le monde entropique	87
3 Ordre et chaos	91
4 Équations cinétiques	96

5 Théorème H de Boltzmann	105
6 Convergence entropique : oubli à marche forcée	110
7 Relaxation isentropique : s'accommoder de ses souvenirs	119
8 Faible dissipation	128
9 Métastatistiques	130
10 Paradoxes perdus	131
Références	137

Christopher Jarzynski

Equalities and Inequalities: Irreversibility and the Second Law of Thermodynamics at the Nanoscale

1 Introduction	145
2 Background and setup	148
3 Equilibrium information from nonequilibrium fluctuations	152
4 Macroscopic hysteresis and microscopic symmetry	156
5 Relative entropy and dissipated work	159
6 Guessing the direction of time's arrow	162
7 Entropy production and related quantities	164
8 Conclusions and outlook	166
References	168

Christophe Salomon

Time Measurement in the XXIst Century

The quest for precision: a brief history	173
Cold atom clocks and the PHARAO Space clock	179
Fundamental physics tests	181
A few applications	183
Future	185
References	185

Huw Price

Time's Arrow and Eddington's Challenge

1 A head of his time	187
2 Introducing 'time's arrow'	189
3 The puzzle of the thermodynamic arrow	191
4 The true puzzle – a first approximation and a popular challenge	192
5 Four things the puzzle is not	193
6 What would a solution look like? Two models	196
7 Which is the right model?	198
8 The Boltzmann-Schuetz hypothesis – a no-asymmetry solution?	199
9 The big problem	200
10 Initial smoothness	202
11 Open questions	204

12	Scepticism about the second law	205
13	Where now for the flow of time?	207
