Abstract	7
Zusammenfassung	9
1 General Introduction	11
1.1 Thesis outline	12
1.2 General facts about cocaine.....	12
1.3 Epidemiology of cocaine use	13
1.4 Cognitive functioning.....	14
1.5 Cocaine use and cognitive functioning: Behavioral research.....	14
1.6 Cocaine use and cognitive functioning: Neuropsychological linkage.....	16
1.7 Research objectives.....	17
1.8 The Zurich Cocaine Cognition Study (ZuCo ² St)	18
1.9 References.....	20
2 Cognitive dysfunctions in recreational and dependent cocaine users: The role of ADHD, craving, and early age of onset.....	23
2.1 Abstract	24
2.2 Introduction	25
2.3 Method	27
2.3.1 Participants	27
2.3.2 Procedure.....	27
2.3.3 Neuropsychological assessment	28
2.3.4 Statistical analysis.....	28
2.4 Results.....	29
2.4.1 Demographic characteristics and drug use	29
2.4.2 Neurocognitive measures.....	31
2.4.3 ADHD, age of onset, craving, depression, and acute drug effects.....	33
2.4.4 Risk threshold for cognitive impairments.....	35
2.5 Discussion	37
2.6 References.....	42
2.7 Supplementary material.....	45
2.7.1 Methods	45
2.7.2 Results	47
2.7.3 References	52

3 Differences in self-reported and behavioral measures of impulsivity in recreational and dependent cocaine users	53
3.1 Abstract	54
3.2 Introduction	55
3.3 Method	57
3.3.1 Participants	57
3.3.2 Procedure	57
3.3.3 Statistical analysis	58
3.4 Results	60
3.4.1 Demographic characteristics and drug use	60
3.4.2 Impulsivity measures	62
3.4.3 Correlation analysis	64
3.4.4 Cofactor analyses	65
3.5 Discussion	66
3.6 References	71
3.7 Supplementary material	74
3.7.1 Methods	74
3.7.2 Results	77
3.7.3 References	80
4 Impairment in cocaine users is drug-induced but partially reversible: evidence from a longitudinal study	81
4.1 Abstract	82
4.2 Introduction	83
4.3 Method	85
4.3.1 Participants	85
4.3.2 Group assignment	85
4.3.3 Procedure	86
4.3.4 Statistical analysis	86
4.4 Results	87
4.4.1 Demographic characteristics and drug use	87
4.4.2 Test scores at baseline	88
4.4.3 Change scores between baseline and follow-up	88
4.4.4 Test scores at follow-up	90
4.4.5 Impact of ceased and strongly intensified cocaine use	90
4.5 Discussion	92
4.6 References	96
4.7 Supplementary material	98
4.7.1 Methods	98
4.7.2 Results	100
4.7.3 References	105

5 General Discussion	106
5.1 Cognitive performance in recreational and dependent cocaine users	107
5.2 Impulsivity in recreational and dependent cocaine users	108
5.3 Cognitive development in increasing and decreasing cocaine users	109
5.4 Strengths.....	110
5.5 Limitations	111
5.6 Implications.....	112
5.7 Perspective	114
5.8 References	116
6 Curriculum Vitae	119
