Acknowledgements.....	I
Abstract.....	II
Zusammenfassung.....	III
Contents.....	IV
List of Tables.....	VII
List of Figures.....	IX
GENERAL INTRODUCTION.....	1
The sensitivity to beauty and goodness in philosophy.....	2
The sensitivity to beauty and goodness in psychology.....	7
Experimental aesthetics.....	7
Appraisal theories of emotions.....	9
Individual differences in the sensitivity to art and beauty.....	10
Relation between personality characteristics and aesthetic preferences.....	12
The sensitivity to beauty and goodness in positive psychology.....	15
Balancing the positive and negative.....	16
The VIA-classification.....	16
Two models of the sensitivity to beauty and goodness.....	20
Research on the sensitivity to beauty and goodness.....	23
Measurement instruments.....	23
Related constructs.....	26
Life outcomes.....	28
Link with musical practice.....	30
Awe as a specific emotional response to beauty and goodness.....	33
Awe in psychology.....	33
Awe in positive psychology.....	34
Measuring the disposition to experience awe.....	35
Open questions and aims of this research.....	37
Procedure.....	41
Development of a stimulus-based test.....	41
Online survey.....	47
References.....	49
PART I - Are only emotional strengths emotional? Character strengths and disposition to positive emotions.....	70
Abstract.....	71
Introduction.....	72
Measuring character strengths.....	73
Measuring the disposition to experience positive emotions.....	74
Relations between character strengths and positive emotions: uni- or bidirectional?.....	75
Aims of the study.....	76

Methods	78
Participants.....	78
Instruments.....	79
Procedure	79
Results.....	80
Primary analyses	80
Factor structure of the DPES	81
Correlations between character strengths and emotional dispositions.....	83
Emotional pattern of character strengths factors.....	85
Discussion.....	87
References.....	93
Appendix A.....	100
PART II - Are there multiple channels through which we connect with beauty and excellence?.....	102
Abstract.....	103
Introduction.....	104
Two models of the sensitivity to the good and beautiful	105
Open questions.....	106
Aims of the research	108
Study I: Development of the ABET.....	108
Method.....	108
Results.....	110
Discussion.....	114
Study 2: Structure of Appreciation	115
Methods	115
Results.....	120
Discussion.....	126
General Discussion	127
References.....	132
Appendix A.....	135
Appendix B	136
PART III – Are musicians particularly sensitive to beauty and goodness?.....	137
Abstract.....	138
Introduction.....	139
Aesthetics-relevant correlates of the sensitivity to beauty and goodness	139
Link between artistic activities and the sensitivity to beauty and goodness	140
Aims of the study.....	141
Methods	143
Participants.....	143
Instruments.....	144
Procedure	146
Results.....	147
Primary analyses	147
Structure of the sensitivity to beauty and goodness.....	148

Link between the sensitivity to beauty and goodness, and aesthetics-relevant constructs.....	149
Differences between samples with respect to responsiveness and aesthetics-relevant constructs	151
Discussion.....	153
References.....	159
GENERAL DISCUSSION	163
Overview of the main results	163
Content and aims of the three studies	163
Research questions and main findings	164
Implications.....	167
Validity of appreciation	167
For the VIA-classification and the VIA-IS	167
For practice	168
Limitations	170
Conception of the ABET	170
Structural equation modeling.....	172
Data collection	172
Open questions and further research.....	173
Difference between excellence and beauty.....	173
Emotions	174
Personalities of musicians.....	175
Conclusion	176
References.....	178
Curriculum Vitae	181
