

## TABLE OF CONTENTS

|  |     |
|--|-----|
| <b>ABSTRACT (ENGLISH)</b> .....  | 2   |
| <b>RESUME (FRANÇAIS)</b> .....   | 3   |
| <b>PUBLICATIONS LIST</b> .....   | 5   |
| <b>CHAPTER 1: INTRODUCTION</b> .....   | 6   |
| 1.1 Amyloid Fibrils Definition.....  | 7   |
| 1.2 Closer Look at Fibrils Structure and Properties.....   | 9   |
| 1.3 Mechanism and Kinetics of Formation.....   | 12  |
| 1.4 Aim and outline of the thesis.....   | 17  |
| 1.5 References.....  | 19  |
| <b>CHAPTER 2: LYSOZYME SELF-ASSEMBLY</b> .....   | 28  |
| 2.1 Article 1: <i>General Self-Assembly Mechanism Converting Hydrolyzed Globular Proteins Into Giant Multistranded Amyloid Ribbons</i> .....                   | 29  |
| 2.2 Article 2: <i>Towards Lysozyme Nanotubes and 3D Hybrids Self-Assembly</i> .....  | 41  |
| 2.3 Article 3: <i>Sub-Persistence-Length Complex Scaling Behavior in Lysozyme Amyloid Fibrils</i> .....  | 55  |
| <b>CHAPTER 3: OVALBUMIN FIBRILLATION</b> .....   | 66  |
| 3.1 Article 4: <i>Self-Assembly of Ovalbumin into Amyloid and Non-Amyloid Fibrils</i> .....  | 67  |
| <b>CHAPTER 4: DISCUSSION AND CONCLUSION</b> .....  | 88  |
| <b>APPENDIX FURTHER RELATED ARTICLES</b> .....   | 92  |
| Article 5: <i>Nano-topographic surfaces with defined surface chemistries from amyloid fibril templates can control cell attachment</i> .....                   | 93  |
| Article 6: <i>Measurement of intrinsic properties of amyloid fibrils by the peak force QNM method</i> .....  | 106 |
| Article 7: <i>Templating effects of lyotropic liquid crystals in the encapsulation of amyloid fibrils and their stimuli-responsive magnetic behavior</i> ..... | 111 |
| <b>ACKNOWLEDGEMENTS</b> .....  | 122 |
| <b>CURRICULUM VITAE</b> .....  | 123 |
