Zusammenfassung	3
Abstract	5
Acknowledgements	9
1. Introduction	15
1.1. The discovery of the Λ_b^0 baryon	16
1.2. Theoretical predictions on the Λ_b^0 lifetime	18
1.3. A brief history of Λ_b^0 lifetime measurements	20
1.4. Outlook	21
I. Lifetime of the Λ_b^0 baryon	25
2. Experimental setup	27
2.1. The Large Hadron Collider at Cern	27
2.2. The Compact Muon Solenoid experiment	30
2.2.1. Muon system	33
2.2.2. Silicon tracker	35
2.2.3. Trigger system	37
2.3. A note on terminology	37
3. Event reconstruction	41
3.1. Data samples	41
3.2. Simulated data (MC)	41
3.3. Triggers	42
3.4. Muons	44
3.5. Candidate selection	46
3.5.1. Creation of N-tuples	46
3.5.2. Kinematic vertex fit	48
3.5.3. Creation of <i>reduced trees</i>	49
3.6. Observables	50
3.7. Event selection	51

4. Fit to data	63
4.1. Detector resolution	63
4.2. Signal composition	64
4.3. Fit definition	65
4.4. Fit validation	66
5. Analysis performance	69
5.1. Closure tests	69
5.1.1. Fits with ideal resolution	69
5.1.2. Fits on private MC with full analysis chain	70
5.2. Resolution	74
5.2.1. Studies comparing to MC truth	74
5.2.2. Studies using per-event errors	75
5.3. Efficiency	80
5.4. MC to data comparison	87
5.5. Background	87
5.6. Performance under pile-up conditions	88
6. Systematic effects	93
6.1. Alignment	93
6.2. Efficiency	94
6.3. Fit model	95
6.4. Final estimation of systematic effects	98
7. Results	101
7.1. Lifetimes and ratio	101
7.2. Cross checks	101
7.2.1. Dataset divisions	101
7.2.2. Robustness against nonprompt background	109
7.2.3. Variations in likelihood function	109
8. Discussion	113
8.1. Improvements in a future analysis	115
8.2. Comparison to theory	117
8.3. Status of publication	117
II. Alignment of the CMS silicon tracker	119
9. Alignment problem and approaches	121
9.1. Track-based alignment algorithms	123
9.2. Millepede-II	124

10. Surface deformations	129
10.1. Computational challenges	132
10.2. Discussion	136
 III. Appendices	 139
A. PDG values	141
B. Excerpts from PDG review of particle properties	143
C. Resolution plots	149
D. Estimation of effect of a linear efficiency curve on a lifetime	157
E. Calculation of per-event errors	159
F. Displaced trigger	161
 IV. Backmatter	 165
Glossary	167
Bibliography	171
Lebenslauf	181
Curriculum vitae	187
