

Table of Contents

Table of Contents 3

1. Abstract 5

2. Introduction 7

 2.1 History 7

 2.2 Primary hyperparathyroidism 8

 2.2.1 Epidemiology 8

 2.2.2 Etiology 9

 2.2.3 Signs and Symptoms 9

 2.2.4 Diagnosis 11

 2.2.4.1 Medical History and Examination 11

 2.2.4.2 Laboratory Diagnostics 11

 2.2.4.3 Preoperative Imaging and Localization procedures 12

 2.2.5 Treatment 14

 2.2.5.1 Guidelines and indications for surgery 14

 2.2.5.2 Contraindications for Surgery 15

 2.2.5.3 Open Parathyroidectomy 16

 2.2.5.4 Minimally Invasive Parathyroidectomy (MIP) 16

 2.2.5.5 Choice of Procedure 20

 2.2.5.6 Alternatives to Surgery 20

 2.3 Objective 21

3. Patients and Methods 22

 3.1 Patients 22

 3.1.1 Surgical techniques 22

 3.1.2 Patient characteristics 23

 3.1.3 Clinical Presentation 23

 3.1.4 Preoperative Serum Calcium 24

 3.1.5 Prior operations in the neck area 24

 3.2 Methods 24

 3.2.1 Preoperative Imaging 24

 3.2.2 Anesthesia and MIP Protocol 25

 3.2.3 Outcome Measurements and Follow Up 26

 3.2.4 Definitions: Biochemical cure, Persistence and Recurrence 26

3.2.5 Statistical Analysis.....	27
4. Results	28
4.2 Preoperative and postoperative serum calcium.....	28
4.2 Intraoperative PTH Concentrations	30
4.3 Anatomical and Histological Findings.....	31
4.4 Duration of Stay	31
4.5 Complications	31
4.6 Recurrence and Persistence	32
5. Discussion.....	33
6. Summary	36
7. Acknowledgments	38
8. References	39
