

Table of Contents

Executive Summary	xix
1 Introduction	1
1.1 Background	1
1.2 Objectives and scope of this paper	3
1.3 Structure of this paper	4
2 Identification of main schemes, their key characteristics, extent/coverage, and promotional efforts	5
2.1 Sustainability initiatives	5
2.2 Third-party fisheries environmental certification schemes	6
2.3 Retailer/foodservice/wholesale/processing sector buying policies related to sustainability of fisheries	17
2.4 Public policy initiatives related to certification	22
3 Benefits of certification schemes, and limitations to greater uptake	25
3.1 Introduction	25
3.2 Benefits of certification	31
3.2.1 Demand by consumers and their perceptions of benefits	31
3.2.2 Demand by, and benefits of certification for, retail/food service sector/wholesale/processing businesses	35
3.2.3 Demand by, and benefits for, producers	37
3.3 Constraints to certification in developing countries	41
3.3.1 A mismatch between certification requirements and the reality of tropical small-scale fisheries?	42
3.3.2 Potential distortions to existing practices and livelihoods?	43
3.3.3 Equity and feasibility?	44
3.4 Can certification bring about improved management?	47
3.5 Future prospects for certification	51
4 Suggested ways of increasing certification in developing countries	53
5 Conclusions and recommendations for future UNEP activities in support of certification	57
Appendix A: References	61
Appendix B: MSC Principles and Criteria	63
Appendix C: Other certification scheme standards	66
Appendix D: Ornamental reef fish supply chain	77
Appendix E: Other environmental sustainability initiatives	80
