1 Introduction	1
I Application-Layer Privacy Protection	9
2 Privacy-Preserving Meeting Scheduling	11
2.1 Introduction	12
2.2 System Architecture	13
2.3 Privacy Definitions	16
2.4 Privacy-Preserving Scheduling Algorithms	22
2.5 Implementation and Performance Evaluation	32
2.6 User Study	39
2.7 Extensions	44
2.8 Related Work	47
2.9 Summary	48
3 Privacy-Preserving Location Determination	51
3.1 Introduction	52
3.2 System Architecture	54
3.3 Problem Definition	56
3.4 Privacy-Preserving Location Determination	57
3.5 Implementation and Performance Evaluation	75
3.6 User Study	78
3.7 Extension	80
3.8 Related Work	82
3.9 Summary	84

II Network-Layer Privacy Exposure	85
4 Privacy of Social Communities in Pervasive Networks	87
4.1 Introduction	88
4.2 System Architecture	89
4.3 Community Analysis	91
4.4 Results	100
4.5 Related Work	103
4.6 Summary	104
5 Privacy of Social Relationships in Pervasive Networks	105
5.1 Introduction	106
5.2 System Architecture	107
5.3 Social Interactions and Communities	108
5.4 Relationship Inference Framework	110
5.5 Results	117
5.6 Related Work	123
5.7 Summary	123
IIICross-Layer Approach for Privacy and Information Sharing	125
6 Adaptive Information-Sharing in Mobile Social Networks	127
6.1 Introduction	128
6.2 The SPISM Information-Sharing Platform	129
6.3 Study and Data Collection	136
6.4 Analysis and Evaluation	139
6.5 Related Work	145
6.6 Summary	147
7 Conclusion	149
Bibliography	151
Index	163
