Abstract	IX
Zusammenfassung	XI
List of Abbreviations, Acronyms and Symbols	XIV
1. Introduction	1
1.1 Polyunsaturated Fatty Acids as Precursors for Oxidized Phospholipids	1
1.1.1 Life in an Atmosphere of Oxygen	1
1.1.2 Origin and Classification of Oxidized Phospholipids.....	2
1.2 The Biosynthesis of Prostaglandins	5
1.2.1 Enzymatic Generation of Endoperoxide PGH ₂ (10)	5
1.2.2 Enzymatic and Non-Enzymatic Isomerization to Various Prostanoids.....	6
1.2.3 Non-Enzymatic Formation of 15d-PGJ ₂ (21).....	7
1.3 The Biosynthesis of Isoprostanes	8
1.3.1 Initiation of the Radical Oxidation.....	8
1.3.2 Formation of the Various Oxidation Products.....	9
1.3.3 Propagation of the Initial Oxidation Products to the Various IsoPs	10
1.3.4 Formation of the Epoxyisoprostane Phospholipids PEIPC and PECPC	11
1.3.5 Impact of Lipid Oxidation on Membrane Structure	12
1.4 Biological Effects of Prostaglandins.....	14
1.4.1 General Function of PGs as Local Hormones	14
1.4.2 Function and Mode of Action of Cyclopentenone PG 15d-PGJ ₂ (21)	14
1.5 Biological Effects of Isoprostanes	16
1.5.1 General Function of IsoPs.....	16
1.5.2 General Function of Cyclopentenone IsoPs	17
1.5.3 Biological Effects of the Epoxyisoprostane IsoPs PEIPC (26b) and PECPC (28b)	18
1.6 Immune System and Inflammation	18
1.6.1 The Innate Immune System.....	19
1.6.2 The Adaptive Immune System.....	19
1.6.3 Inflammation and Inflammatory Disease	21

1.7 Synthetic Strategies towards the Synthesis of Prostaglandins.....	23
1.7.1 Corey's Synthesis of PGF _{2α} (44)	23
1.7.2 Woodward's Synthesis of PGF _{2α} (44).....	24
1.7.3 Noyori's Synthesis of PGF _{2α} (44).....	25
1.7.4 Aggarwal's Synthesis of PGF _{2α} (44).....	26
1.7.5 Overview of the Syntheses of PGF _{2α} (44)	27
1.8 Synthetic Strategies towards 15d-PGJ ₂	28
1.8.1 Sutton's Synthesis of 15d-PGJ ₂ (21).....	28
1.8.2 Brummond's Synthesis of 15d-PGJ ₂ (21).....	28
1.8.3 Kobayashi's Synthesis of 15d-PGJ ₂ (21)	29
1.8.4 Suh's Synthesis of 15d-PGJ ₂ (21)	30
1.8.5 Overview of the Syntheses of 15d-PGJ ₂ (21).....	31
1.9 Synthetic Strategies towards the Synthesis of Isoprostanes.....	32
1.9.1 Larock's and Cha's Syntheses of 15-F _{2c} -IsoP (107)	32
1.9.2 Renaud's Synthesis of 15-F _{2c} -IsoP (107)	33
1.9.3 Taber's Synthesis of 15-F _{2c} -IsoP (128)	33
1.9.4 Rokach's Synthesis of 12-F _{2c} -IsoP (140).....	34
1.10 Synthetic Strategies towards the Epoxyisoprostane	35
Phospholipids PECPC and PEIPC.....	35
1.10.1 Kobayashi's Synthesis of PECPC (28b).....	36
1.10.2 Jung's Syntheses of PEIPC (26b)	36
2. Aims and Scope.....	38
3. Results and Discussion	40
3.1 Preliminary Considerations	40
3.2 Initial Attempts to Epoxyisoprostane EI (164).....	42
3.2.1 Synthetic Planning	42
3.2.2 Synthesis of the Building Blocks	42
3.2.2.1 Synthesis of 4-Hydroxy-2-Cyclopentenone (175).....	42
3.2.2.2 Synthesis of the α-Chain Epoxy Aldehyde	44
3.2.3 Assembly of the Building Blocks.....	45
3.2.3.1 The Baylis–Hillman Approach.....	45
3.2.3.2 The Baylis–Hillman Approach with DMTr as the Protecting Group	49
3.2.3.3 The Baylis–Hillman Approach with PMB as the Protecting Group.....	51
3.2.3.4 Propargylation Approach of the Baylis–Hillman Adduct 194c	51
3.2.3.5 Conclusions from the Baylis–Hillman Approach	53

3.2.4 The Oxabicyclo[2.2.1]heptane Approach	54
3.2.4.1 Synthetic Planning	54
3.2.4.2 Synthesis of the Cyclization Precursor	54
3.2.5 The Diels–Alder Approach	57
3.2.5.1 Synthetic Planning	57
3.2.5.2 Diels–Alder Reactions with Bromoenone 223	57
3.2.5.3 Diels–Alder Reactions with Cyclopentenone 175d	58
3.2.5.4 Elaboration of Diels–Alder Adduct 233	59
3.3 First Generation Synthesis of PECPC (28b) and 15d-PGJ ₂ (21).....	61
3.3.1 Synthetic Planning	61
3.3.2 Synthesis of the Common Precursor 249	61
3.3.3 Synthesis of 15d-PGJ ₂ (21) and 15d-PGJ ₂ -PC (255).....	62
3.3.4 Synthesis of EC (154) and PECPC (28b)	63
3.3.5 Initial Biological Tests	65
3.3.6 Conclusion	67
3.4 Second Generation Synthesis of PECPC (28b), PEIPC (26b) and 15d-PGJ ₂ (21).....	68
3.4.1 Synthetic Planning	68
3.4.2 Synthesis of Cyclization Precursor (268) for the Synthesis of EC (154).....	69
3.4.3 C–H Insertion/Cyclization Studies and Completion of the Synthesis of EC/PECPC (154/28b)	70
3.4.4 Endocyclic Enone Hydration and Completion of the Synthesis of EI/PEIPC (164/26b).....	71
3.4.4.1 Attempted Borylation of the Dienone.....	72
3.4.4.2 Tamao–Fleming Approach towards Alcohol 277	73
3.4.4.3 Epoxidation/Epoxide Opening Approach to Alcohol 277	74
3.4.4.4 Completion of the Synthesis of EI (164) and PEIPC (26b)	76
3.4.4.5 Comparison of the Biological Activity of EC/PECPC (154/28b) and EI/PEIPC (164/26b).....	77
3.4.4.6 Conclusion	78
3.4.5 Second Generation Synthesis of 15d-PGJ ₂ (21).....	78
3.4.5.1 Synthesis of the α -Chain Aldehyde 282	79
3.4.5.2 Second Generation Synthesis of 15d-PGJ ₂ (21).....	79
3.4.5.3 Conclusion	80
3.5 Effects of the Epoxyisoprostanes and 15d-PGJ ₂ on the Polarization of Naïve CD4 ⁺ T-Cells.....	81
3.6 Synthetic Analogs of EC (154) and 15d-PGJ ₂ (21).....	83
3.6.1 Comparison of 15d-PGJ ₂ (21), EC (154) and EI (164)	83
3.6.2 Synthesis of a First Generation of EC-Analogs	84

3.6.3 Biological Testing of the First-Generation EC-Analogs	86
3.6.4 Synthesis of 15d-PGJ ₂ -Analogues	88
3.6.5 Biological Testing of the 15d-PGJ ₂ -Analogues	91
3.6.6 Synthesis of a Second Generation of EC-Analogues	92
3.6.7 Biological Testing of the Second-Generation EC-Analogues	94
3.6.8 Conclusion	95
3.7 Synthesis of Bioorganic Tools from EC and 15d-PGJ ₂	97
3.7.1 Investigation of the Fate of the PC-Moiety	97
3.7.2 Synthesis of a Biotin-Containing Phosphatidylcholine	97
3.7.3 Synthesis of Cross-Linker/Biotin-Containing Analogues	100
3.7.4.1 Synthesis of the Cross-Linker Subunit	101
3.7.4.2 Synthesis of the EG-Biotin Linker	101
3.7.4.3 Synthesis of PMB-Protected Hydroxy-Enal	102
3.7.4.4 Synthesis of 15d-PGJ ₂ -XLink-Biotin	103
3.7.4.5 Synthesis of EC-XLink-Biotin	104
4. Conclusion and Outlook	106
5 Experimental Section	108
5.1 General Methods	108
5.2 Experimental Details:	110
5.2.1 Initial Attempts towards EI	110
5.2.2 First Generation Synthesis of 15d-PGJ ₂ and PECPC	119
5.2.2.1 First Generation Approach to 15d-PGJ ₂	119
5.2.2.2 First Generation Approach to PECPC	125
5.2.3 Second Generation Synthesis of PECPC, PEIPC and 15d-PGJ ₂	130
5.2.3.1 Second Generation Approach to PECPC and PEIPC	130
5.2.3.2 Second Generation Approach to 15d-PGJ ₂	138
5.2.4 Synthetic Analogues of EC and 15d-PGJ ₂	144
5.2.4.1 First Generation Analogues of EC	144
5.2.4.2 Analogues of 15d-PGJ ₂	149
5.2.4.3 Second Generation Analogues of EC	163
5.2.5 Synthesis of Bioorganic Tools from EC and 15d-PGJ ₂	169
6. Bibliography	184
Curriculum Vitae	193
