<b>Introduction</b>	<b>17</b>
<b>1 Insulating and dielectric response of deformable and non-deformable dielectrics</b>	<b>27</b>
1.1 Introduction . . . . .	27
1.2 Working principle and physics behind EBL . . . . .	35
1.3 Deformable dielectrics: working principle and physics behind	44
1.4 Description of the experimental setup and methodology . .	51
1.5 Electrical characterization of EBL's constituents: dielectric and insulating response . . . . .	58
1.5.1 EBL: Dielectric strength measurements . . . . .	59
1.5.2 EBL: Relative permittivity measurements . . . . .	60
1.5.3 Expected Maxwell stress in EBL . . . . .	65
1.6 Dielectric and insulating properties of acrylic elastomer membranes . . . . .	70
1.6.1 Acrylic elastomer membranes: VHB 4910 . . . . .	72
1.6.2 VHB 4910: volume resistivity . . . . .	73
1.6.3 VHB 4910: relative permittivity . . . . .	78
1.6.4 VHB 4910: energy considerations . . . . .	80
1.7 Conclusion . . . . .	82
<b>2 Dielectrics engineering for EBL</b>	<b>83</b>
2.1 Introduction . . . . .	83

2.2	Static capacitance measurements in real condensers . . . . .	86
2.3	Breakdown phenomena in dielectrics . . . . .	88
2.4	Frequency dependent dielectric and insulating response in MLD: theoretical formulation . . . . .	95
2.4.1	Maxwell's hints . . . . .	95
2.4.2	Hypothesis of dielectric response enhancement . . . . .	99
2.4.3	Physical model of multilayered dielectrics . . . . .	100
2.5	Frequency dependent dielectric and insulating response in MLD: analytical and experimental results . . . . .	109
2.5.1	Analytical results of the physical model applied to other MLDs . . . . .	117
2.6	Conclusion . . . . .	120
<b>3</b>	<b>Electromechanical characterization of EBL</b>	<b>123</b>
3.1	Introduction . . . . .	123
3.2	Morphing concepts for EBL . . . . .	125
3.3	Experimental investigation of EBL in single lap shear arrangements . . . . .	129
3.4	Experimental investigation of EBL in double lap shear and 3-point bending arrangements . . . . .	139
3.5	Conclusion . . . . .	147
<b>4</b>	<b>Conclusion and outlook</b>	<b>149</b>
4.1	Summary . . . . .	149
4.2	Scientific contribution . . . . .	151
4.3	Outlook and perspectives . . . . .	158
	<b>Bibliography</b>	<b>169</b>
