Abstract (English/Deutsch)	vii
List of figures	xiii
List of tables	xvii
I Introduction	1
1 Motivation	3
1.1 The Significance of Modeling Work	3
1.2 Reconstruction and Modeling of a Neocortical Microcircuit by the BBP	3
1.3 Validating, Predicting and Understanding Microcircuit Activity	4
1.4 Extraction of Extracellular Potentials from a Neocortical Microcircuit Simulation	5
1.5 Prerequisites for a biologically accurate extracellular potential <i>in-silico</i>	5
1.5.1 The Relevance of a Local Connectome Derivation	5
1.5.2 The Relevance of Unitary Synaptic Conductances	6
1.5.3 The Relevance of Cell Placement	7
1.5.4 The Relevance of Generating Microcircuit Input	8
2 An overview of the Blue Brain microcircuit model building process	9
3 Summary of Results	13
II Microcircuit Modeling Methods	15
4 An Algorithm to Predict the Connectome of Neural Microcircuits	17
4.1 Abstract	18
4.2 Introduction	18
4.3 Results	19
4.4 Discussion	27
4.5 Methods	30
4.6 Figures, tables and legends	32
	xi

A	Supplementary Material	42
5	Further Methods	53
5.1	Derivation of Synaptic Quantal Conductances	53
5.1.1	The approach to conductance prediction	54
5.1.2	The prediction method	54
5.1.3	Validating predictions	55
5.2	Cell Placement	57
5.2.1	Relevance	57
5.2.2	Method	57
5.2.3	Results	59
5.3	Input Generation	60
5.3.1	Thalamocortical Input	60
5.3.2	Simulated Extracellular Stimulation	65
III	Microcircuit Modeling Results	69
6	An Analysis of the Predicted Connectome of Neural Microcircuits	71
6.1	Abstract	72
6.2	Introduction	72
6.3	Results	73
6.4	Discussion	79
6.5	Methods	81
6.6	Figures, tables and legends	83
A	Supplementary Material	91
7	In-silico measurements of extracellular potentials	95
7.0.1	Overview	95
7.0.2	Implementing a volume conductor based calculation of extracellular potentials	95
8	A Biophysically Detailed Model of Neocortical Local Field Potentials Predicts the Critical Role of Active Membrane Currents	99
8.1	Summary	101
8.2	Introduction	102
8.3	Results	103
8.4	Discussion	109
8.5	Methods	113
8.6	Figures	117
A	Supplementary Material	130

9 Further Results	141
9.1 The limits of spike detection in extracellular signals	141
9.1.1 Introduction	141
9.1.2 Spike detection and mapping methods	141
9.1.3 Results	143
9.1.4 Conclusions	146
9.2 Comparing Structural and Functional Inhibition under In-Vitro and In-Vivo Conditions	146
9.2.1 Introduction	146
9.2.2 Methods	148
9.2.3 Results	148
9.2.4 Conclusions	150
IV Concluding Remarks	151
10 Context and Relevance of This Work	153
11 Ongoing and Future Work	155
A Supplementary Material	157
A.1 Example of a thalamocortical projection specification	157
B A Brief Introduction into the Underlying Neuroscientific Concepts	161
B.1 From Brain to Neocortex to Microcircuits	161
B.2 About Extracellular Measurements in Neural Tissue	162
C Reconstruction of the Neocortical Microcircuit	163
C.1 Introduction	165
C.2 Biological Reconstruction Process	166
C.3 Morphological diversity	167
C.4 Morpho-electrical diversity	170
C.5 The Connectome	170
C.6 Neuronal Physiology	173
C.7 Synaptic Physiology	174
C.8 Network dynamics - spontaneous activity	176
C.9 Network dynamics - evoked activity	178
C.10 Discussion	179
C.11 Figures and Legends	184
A Supplementary Figures	208
Bibliography	240
Curriculum Vitae	241
