SUMMARY	1
ZUSAMMENFASSUNG	2
GENERAL INTRODUCTION	5
1.1 ON FUNGAL RECOGNITION BY THE HOST	5
1.2 ON THE ORCHESTRATION OF ANTIFUNGAL T CELL RESPONSES	7
1.3 ON THE FORGETFULNESS AND MEMORY OF TH17 CELLS	8
1.4 ON IL-17 AND ANTIFUNGAL IMMUNITY	11
1.5 ON CHRONIC MUCOCUTANEOUS CANDIDIASIS AND IL-17 DEFICIENCIES	12
1.6 ON INFECTION MODELS OF MUCOCUTANEOUS CANDIDIASIS	14
AIMS OF THE THESIS	17
CHAPTER I - Determinants of Th17 Immune responses during mucosal <i>Candida albicans</i> infection	19
2.1 ABSTRACT	19
2.2 INTRODUCTION	20
2.3 RESULTS AND DISCUSSION	22
2.3.1 ORAL <i>C. ALBICANS</i> INFECTION INDUCES ROBUST AND SELECTIVE TH17 PRIMING	22
2.3.2 TH17 MEMORY-LIKE CELLS ARE PRIMED DURING OPC AND DISPLAY SOLID LINEAGE FIDELITY	24
2.3.3 IL-6 AND IL-1 SIGNALING ARE INDISPENSABLE FOR TH17 PRIMING	26
2.3.4 ILCs HAVE AN IMPACT ON TH17 PRIMING DURING OPC	28
2.4 MATERIAL AND METHODS	30
2.5 ACKNOWLEDGEMENTS	31
CHAPTER II - Generation of a <i>C. albicans</i>-specific T Cell Receptor Transgenic Mouse - 'HECTOR'	33
3.1 ABSTRACT	33
3.2 INTRODUCTION	34
3.3 RESULTS AND DISCUSSION	35
3.3.1 TCR TG MOUSE EXPRESSES V α 2 AND V β 4 CHAINS CLONED FROM CANDIDA-SPECIFIC T CELL HYBRIDOMA.	35
3.3.2 THE NEW <i>C. ALBICANS</i> -SPECIFIC TCR TG MOUSE LINE 'HECTOR' EXPRESSES TCR V α 2 AND V β 4 CHAINS.	36
3.3.3 THE TG TCR RECOGNIZES A CONSERVED EPITOPE IN CANDIDA SPP.	37
3.3.4 THE ALCOHOLDEHYDROGENASE 1 (ADH1) HARBORS THE EPITOPE RECOGNIZED BY THE TG TCR.	38
3.3.5 CD4 ⁺ HECTOR CELLS DIFFERENTIATE INTO EFFECTOR T CELLS IN AN ANTIGEN-DEPENDENT MANNER	40
3.4 MATERIAL AND METHODS	42

3.5 ACKNOWLEDGEMENTS	45
3.6 SUPPLEMENTARY MATERIAL AND METHODS	45
<u>CHAPTER III - IL-17-secreting ILCs are essential for host defense against fungal infection</u>	<u>49</u>
4.1 ABSTRACT	49
4.2 INTRODUCTION	50
4.3 RESULTS AND DISCUSSION	51
4.3.1 THE ADAPTIVE IMMUNE SYSTEM IS DISPENSABLE FOR THE RESOLUTION OF OPC	51
4.3.2 ILCs ARE THE PRIMARY SOURCE OF IL-17 DURING OPC	51
4.3.3 ILCs ARE KEY PLAYERS IN MEDIATING HOST DEFENSE AGAINST C. ALBICANS.	54
4.4 MATERIALS AND METHODS	57
4.5 ACKNOWLEDGEMENTS	58
<u>GENERAL DISCUSSION</u>	<u>59</u>
5.1 TH17 CELLS AT THE CROSS ROAD OF PLASTICITY AND MEMORY DURING MUCOSAL ANTIFUNGAL IMMUNITY	59
5.1.1 WHAT FACTORS AND CONDITIONS INFLUENCE TH17 PRIMING AND PLASTICITY DURING FUNGAL INFECTIONS?	59
5.1.2 DOES TH17 MEMORY EXIST – EVEN IN ABSENCE OF ANTIGEN?	61
5.1.3 CONCLUDING REMARKS	63
5.2 INNATE LYMPHOID CELLS: NEW PLAYERS IN IL-17-MEDIATED ANTIFUNGAL IMMUNITY	63
5.2.1 HOW DOES IL-17 MEDIATE ANTIFUNGAL IMMUNITY?	63
5.2.2 WHICH CELLULAR SOURCES PROVIDE IL-17 DURING FUNGAL INFECTION?	64
5.2.3 HOW IS IL-17 PRODUCTION BY ILCs REGULATED?	65
5.2.4 FROM MICE TO MAN: DO ILCs PLAY A ROLE IN ANTIFUNGAL IMMUNITY IN HUMANS?	66
5.2.5 DO ILCs IMPACT ON LONG-TERM PROTECTION?	66
5.2.6 CONCLUDING REMARKS	67
5.3 OPEN QUESTIONS	67
5.4 CLOSING REMARKS	68
<u>APPENDIX</u>	<u>69</u>
<u>REFERENCES</u>	<u>71</u>
<u>CURRICULUM VITAE</u>	<u>87</u>
<u>ACKNOWLEDGEMENTS</u>	<u>89</u>
