<b>Table of contents</b>	<b>iii.</b>
<b>Summary</b>	<b>vii.</b>
<b>Zusammenfassung</b>	<b>xi.</b>
<b>Introduction</b>	<b>1</b>
1.1 Chirality, a property of nature .....	3
1.2 Implication of chirality on chemistry and biology .....	3
1.3 Production of enantiopure compounds .....	5
1.3.1 Chiral pool .....	6
1.3.2 Resolution of Racemate .....	6
1.3.3 Prochiral substrate and asymmetric synthesis .....	8
1.4 Cinchona-modified metal catalysts .....	13
1.4.1 C=O bond hydrogenation on cinchona modified Pt .....	14
1.4.2 C=C bond hydrogenation on cinchona modified Pd .....	20
1.5 Aim of thesis .....	21
1.6 Outline of thesis .....	22
<b>Simultaneous probing of bulk liquid phase and catalytic gas-liquid-solid interface under working conditions using attenuated total reflection infrared spectroscopy</b>	<b>25</b>
2.1 Introduction .....	27
2.2 Theoretical background .....	29
2.2.1 ATR-IR spectroscopy .....	29
2.2.2 Modulation excitation spectroscopy and phase-sensitive detection .....	31
2.3 Design of the set-up .....	33
2.3.1 Spectroscopic ATR-IR cell .....	33
2.3.2 Peripheral set-up .....	35
2.3.3 Experimental details .....	38
2.4 Performance and opportunities .....	39
2.4.1 Investigation of coadsorption on the catalytic surface .....	39
2.4.2 Acquisition of difference spectra .....	41
2.4.3 Hydrogen transfer to liquid phase .....	45
2.4.4 Mixing in the recycle reactor .....	46
2.4.5 Operando monitoring .....	50
2.4.6 Application of MES and PSD .....	53
2.5 Conclusion .....	56

<b>Kinetics and isotope effect in the hydrogenation of trifluoroacetophenone</b>	<b>57</b>
3.1 Introduction .....	59
3.2 Experimental section .....	60
3.2.1 Materials .....	60
3.2.2 Catalytic hydrogenations and deuterations .....	61
3.2.3 Time-resolved ATR-IR spectroscopy .....	62
3.3 Results .....	63
3.3.1 Influence of modifier concentration .....	63
3.3.2 Influence of pressure .....	63
3.3.3 Influence of substrate concentration .....	65
3.3.4 Continuous monitoring of the liquid phase .....	68
3.3.5 Kinetic isotope effect .....	70
3.4 Discussion .....	72
3.5 Conclusions .....	76
<b>Origin of enantioselectivity in the hydrogenation of trifluoroacetophenone</b>	<b>77</b>
4.1 Introduction .....	79
4.2 Experimental section .....	81
4.2.1 Materials .....	81
4.2.2 Preparation of catalyst layer .....	81
4.2.3 IR Spectroscopy of the solid-liquid interface .....	81
4.2.4 IR Spectroscopy of solutions .....	82
4.2.5 computations .....	82
4.3 Results and discussion .....	82
4.3.1 Interaction between CD and trifluoro compounds at the solid-liquid interface .....	82
4.3.2 Enantiodiscrimination on CD-Pt/Al <sub>2</sub> O <sub>3</sub> .....	85
4.3.3 Interactions between TFA and modifier in liquid solution .....	86
4.3.4 Enantiodiscrimination on TFA-CD-Pt/Al <sub>2</sub> O <sub>3</sub> .....	92
4.4 Conclusions .....	96
<b>Hydrogenation of prochiral alkenoic acid on cinchonidine-modified Pd catalyst: origin of rate and enantioselectivity enhancement by amine addition</b>	<b>99</b>
5.1 Introduction .....	101
5.2 Experimental section .....	101
5.3 Results and discussion .....	102
5.3.1 Substrate and product interaction with BA .....	102
5.3.2 Surface interaction between CD and BA .....	104
5.4 Conclusion .....	106
<b>Spectroscopic evidence for an O-H-O hydrogen-bond interaction between substrate and modifier</b>	<b>107</b>

6.1	Introduction .....	109
6.2	Experimental section .....	110
6.3	Results and discussion .....	110
6.3.1	Formation of an O-H-O surface complex .....	110
6.3.2	Stereochemistry of the diastereomeric surface complex .....	113
6.4	Conclusion .....	114

**Monitoring of surface processes during heterogeneous asymmetric hydrogenation of ketones on a chirally-modified platinum catalyst by operando spectroscopy** **115**

7.1	Introduction .....	117
7.2	Experimental section .....	118
7.3	Results and discussion .....	119
7.3.1	Chiral modification of the catalyst .....	119
7.3.2	Hydrogenation on unmodified and CD-modified catalyst .....	120
7.3.3	Hydrogenation runs of activated ketones on CD-modified catalyst .....	121
7.3.4	Influence of substrate and product concentration .....	124
7.4	Conclusion .....	126

**Summary & Outlook** **127**

**References** **131**

**Appendices** **151**

**Supporting Information for Chapter 2** **147**

1.	Calculated spectra of TFAP and PTFE .....	147
----	---	-----

**Supporting Information for Chapter 3** **155**

1.	Additional experimental data for the deuteration of 0.2 M TFAP .....	151
2.	Langmuir-Hinshelwood-Hougen-Watson kinetic model .....	151
3.	Additional data for the KIE determination at 0.68 and 1.0 mM CD at 5 bar partial pressure .....	154

**Supporting Information for Chapter 4** **161**

1.	IR spectra of TFAP adsorption on Pt/Al <sub>2</sub> O <sub>3</sub> from He-saturated toluene at 283 K .....	159
2.	IR spectra of TFAP adsorption on CD-Pt/Al <sub>2</sub> O <sub>3</sub> from H <sub>2</sub> -saturated toluene at 298 K .....	160

3.	IR spectra of TFA on CD-Al <sub>2</sub> O <sub>3</sub> and on CD-Pt/Al <sub>2</sub> O <sub>3</sub> .....	160
4.	ATR-IR spectra of toluene-solutions containing TFA and quinuclidine derivatives for the wavenumber region from 4000 – 1050 cm <sup>-1</sup> .....	161
5.	Theoretical calculations .....	162
<b>Supporting Information for Chapter 5</b>		<b>171</b>
1.	Experimental section.....	169
2.	Experiments governing CD adsorption .....	170
3.	References.....	172
<b>Supporting Information for Chapter 6</b>		<b>171</b>
1.	Experimental section.....	175
2.	KPL adsorption-desorption on CD-modified Pt/Al <sub>2</sub> O <sub>3</sub> .....	176
3.	(R)-PL and (S)-PL concentration modulation on Pt/Al <sub>2</sub> O <sub>3</sub> saturated with solution of KPL and CD .....	178
4.	Toluene ATR-IR-spectra during adsorption-desorption of He- and H <sub>2</sub> -saturated solvent .....	178
5.	References.....	179
<b>Supporting Information for Chapter 7</b>		<b>182</b>
1.	Experimental section.....	183
2.	Catalytic hydrogenations in conventional semi-batch reactor.....	184
3.	Gas chromatography for determination of conversion and ee.....	185
4.	Additional conversion and ee data of the operando hydrogenation study..	185
5.	Results of catalytic hydrogenations in conventional semi-batch reactor..	187
6.	Comparison of Surface Spectra during hydrogenation and deuteration on unmodified and CD-modified catalyst .....	188
7.	ATR-IR Spectra of pure compounds (CD, KPL, TFAP, MBF).....	192
8.	References.....	197
<b>Curriculum Vitae</b>		<b>199</b>
