Abstract 11

Zusammenfassung..... 12

Introduction..... 13

 Hematopoiesis and T cells..... 13

 Hematopoiesis and the different hematopoietic lineages 13

 T cell development 14

 The different types of T cells..... 16

 The Notch signaling pathway..... 19

 Historical overview 19

 The molecular basis of Notch signaling..... 20

 Notch signaling in tissue development and maintenance..... 24

 Notch signaling in hematopoiesis..... 27

 microRNAs..... 29

 Historical overview 29

 Biogenesis and function of miRNAs 30

 The role of miRNAs in tissue development and maintenance 33

 miRNAs in early hematopoiesis..... 34

 miRNAs in B and T cell development 36

 Cancer..... 39

 Hallmarks of cancer..... 39

 Notch signaling in cancer 40

 microRNAs in cancer 43

 Acute lymphoblastic T cell leukemia..... 46

 Leukemia..... 46

 Molecular pathogenesis of T-ALL 47

 Notch signaling in T-ALL..... 47

 microRNAs in leukemia..... 48

 Clinical treatment regimens for acute lymphoblastic leukemia 50

Objectives of my studies 51

Materials and Methods 52

 Molecular cloning..... 52

 Vector cloning strategies 52

 Retro- and lentivirus production and transduction of cells..... 55

 DNA analysis and transcriptome assessment 57

 Nucleotide extraction and PCR protocols 57

 Quantitative RT PCR protocols and sample preparation..... 58

 List of primers for PCR and quantitative RT PCR 59

 Large-scale miRNA microarray-based expression analysis..... 60

 Animals 62

 Ethics statement..... 62

 Mouse strains..... 62

 Generation of bone marrow chimeric mice 62

 Tissue culture 64

 Human and murine cell lines, primary cells and tissue culture media 64

 RNA interference, locked nucleic acids and plasmid transfection 65

 Flow cytometry and cell sorting..... 66

 Analysis of lymphoid and leukemic cells..... 66

 Antibody list..... 68

 Bioinformatics and statistics 70

 Software and programming tools 70

 Publicly available gene expression resources..... 71

 Statistical considerations 71

Results 72

 Part I: *Dicer1* is essential for the initiation and maintenance of T-ALL 72

 T-ALL induction is prevented in the absence of *Dicer1* 72

 Non-transformed progenitor cells give rise to mature T cells in the absence of *Dicer1* 76

Dicer1 does not act as a haploinsufficient tumor suppressor in *Notch1*-driven T-ALL 78

 T-ALL maintenance relies on functional *Dicer1* 80

 Late-stage T-ALL cells counter-select *Dicer1* deletion 84

Dicer1 deficient T-ALL cells undergo apoptosis..... 86

 Part II: miR-21 is a novel oncogene in *Notch1*-driven T-ALL 90

 miR-21 is differentially expressed in thymocytes and over-expressed in T-ALL..... 90

 High miR-21 expression does not always result in miR-21 target gene repression 92

 miR-21 acts as an oncogene in T-ALL through inhibition of apoptosis 96

miR-21 KD leads to the de-repression of target genes linked to apoptosis.....	98
Over-expression of miR-21 target gene <i>PDCD4</i> induces apoptosis in T-ALL cells	101
Discussion	103
Notch-driven T-ALL requires mature miRNAs.....	103
The loss of <i>Dicer1</i> prevents acute lymphoblastic leukemia induction.....	103
<i>Dicer1</i> does not act as a haploinsufficient tumor suppressor in T-ALL.....	104
Acute lymphoblastic and myeloblastic leukemia differ in their miRNA requirement.....	105
Normal T cells do not strictly require mature miRNAs for development.....	106
Oncogenic miRNAs prevent apoptosis induction in established T-ALL	107
The <i>Dicer1</i> LOF phenotype in T-ALL is likely due to impaired miRNA biogenesis.....	110
Is <i>Dicer1</i> a promising pharmaceutical drug target in T-ALL?	111
microRNA-21 in <i>Notch1</i> -driven T-ALL	113
Microarray analysis reveals many conserved miRNAs in mouse and human T-ALL	113
miR-21 is a well-described oncogene in a variety of solid tumors	117
miR-21 “activity” in thymocytes and T-ALL may be microenvironmentally regulated.....	118
In T-ALL, miR-21 acts as a context-dependent inhibitor of apoptosis	121
Dicer1 and miR-21 in T-ALL: Perspectives	124
Dicer1 inhibitors in T-ALL	124
The role of miR-21 in T-cell development.....	124
The regulation and target genes of miR-21 in T-ALL.....	125
The clinical relevance of cancer-associated miRNAs	125
Acknowledgements	127
Appendix.....	128
Plasmid vector maps.....	128
pENTR1A_MOD_+ (Gateway cloning donor vector).....	128
pL_Puro (Gateway cloning acceptor vector).....	128
pL_Cre ^{ERT} _Puro	129
pL-eGFP ^{lox} _Blast.....	129
pL-miRT_X (Activity reporter Backbone).....	130
pL-hPDCD4-eGFP	131
pL-+eGFP	131
miRNA large scale expression analysis (heatmaps).....	132
Murine miRNA analysis, global expression pattern of n=409 expressed miRNAs	132
Human T-ALL analysis, global expression pattern of n=452 expressed miRNAs	133
Figure index.....	134
