Abstract	v
Zusammenfassung	vii
1 Introduction	1
1.1 Radiocarbon	1
1.2 ¹⁴ C in carbonates	3
1.3 ¹⁴ C-measurement techniques	5
1.3.1 Decay counting	6
1.3.2 Accelerator mass spectrometry	6
1.3.3 Saturated-absorption cavity ring-down spectroscopy	11
1.4 ¹⁴ C data-evaluation	11
1.5 Sample preparation for AMS analysis	14
1.6 Laser Ablation	15
1.6.1 Lasers types applied in laser ablation	16
1.6.2 The ablation process	19
1.6.3 LA-cells	22
1.7 Motivation and aim of the present work	23
1.7.1 Previous work and proof of principle	23
1.7.2 The potential of LA-AMS for carbonate records	24
1.7.3 This work	25
2 Fundamental experiments	26
2.1 CO ₂ conversion efficiencies of different laser sources	26
2.1.1 Experimental setup	26
2.1.2 Results and discussion	29
2.2 Ablation threshold for carbonates	32
2.3 C-flow calibration at the MICADAS	32
2.4 Summary	33
3 Instrumental setup	35
3.1 Laser system and sample observation	35
3.2 LA-cell development	39
3.2.1 Design and construction of the top part	39
3.2.2 Design of the complete AMS-cell	47
3.3 The MICADAS AMS System	49

4	Samples and sample preparation	52
4.1	Sample preparation	52
4.2	Calibration standards and reference materials	53
4.3	Natural samples	55
5	Characterization of the setup	58
5.1	Instrumental characterization	58
5.1.1	Comparison of inserts	58
5.1.2	Ablation rate	64
5.1.3	Sensitivity and signal stability	64
5.1.4	Overall considerations	67
5.2	Radiocarbon analyses with LA	69
5.2.1	Blank level	69
5.2.2	Washout and cross-contamination	71
5.2.3	Reproducibility of analyses of reference materials	73
5.2.4	Summary	74
5.3	Sampling strategies	75
5.3.1	Discrete layer analyses	77
5.3.2	Survey scan	78
5.3.3	Precision scan	78
5.3.4	Summary	80
6	LA-AMS of natural samples	83
6.1	Terrestrial carbonates	83
6.1.1	Stalagmite BU-4	84
6.1.2	Stalagmite SOP-20	85
6.1.3	Stalagmite SPA-127	96
6.2	Marine carbonates	99
6.2.1	Coral samples	99
6.2.2	Other marine carbonates	102
6.3	Summary	105
7	Conclusion and Outlook	108
	Appendices	111
	A LA-AMS Software	112
	References	116
	Danke	133
	Curriculum vitae	135
