

Table of Contents

Summary	1
Zusammenfassung	2
1. Cells, membranes and transmembrane proteins	5
1.1 The cell as the fundamental unit of living systems	5
1.2 Membranes	6
1.2.1 Cell membranes	6
1.2.2 Synthetic lipid membranes	7
1.3 Transmembrane proteins	8
1.3.1 Insertion and folding of TM proteins and hydrophobicity scales	12
1.3.2 Protein-folding problem	23
1.3.3 Levinthal's paradox	25
1.3.4 <i>De novo</i> protein design	26
1.3.5 The concept of free energy landscape	27
1.3.6 Unfolding of proteins	31
2. The atomic force microscope	34
2.1 Setup and working principle	34
2.1.1 Photodetector calibration	37
2.1.2 Piezoelectric scanner calibration	38
2.1.3 Sensitivity and spring constant calibration	38
2.2 Applications	42
2.2.1 Imaging	43
2.2.2 Sensing	45
2.2.3 Force spectroscopy	45
3. Single-molecule force spectroscopy	48
3.1 SMFS techniques	48
3.1.1 Optical tweezers	49
3.1.2 Magnetic tweezers	51
3.1.3 AFM based SMFS	52
3.2 Polymer extension models	54
3.2.1 The freely jointed chain model	54
3.2.2 The freely rotating chain model	56
3.2.3 The worm-like chain model	57
3.3 Dynamic force spectroscopy	60

3.3.1 Bell-Evans model	63
3.3.2 Dudko-Hummer-Szabo model	65
3.3.3 Friddle-Noy-De Yoreo model	66
3.4 Fluctuation theorems	68
3.4.1 Jarzynski equality	68
3.4.2 Crooks fluctuation theorem	69
4. Single-molecule force spectroscopy from freely spanning purple membrane	71
4.1 Introduction	72
4.2 Experimental procedure	74
4.2.1 Preparation of porous substrates	74
4.2.2 Sample preparation	74
4.2.3 AFM imaging and SMFS description	75
4.2.4 FD curve selection and analysis	76
4.3 Results and discussion	77
4.3.1 Mechanical unfolding of single BR from freely spanning PM	77
4.3.2 Deflection of freely spanning PM moves force peaks to larger distances	80
4.3.3 BRs from mica-supported and freely spanning PM show the same major and minor unfolding intermediates	84
4.3.4 BR in mica-supported and freely spanning PM shows similar mechanical stability	87
4.4 Conclusion	89
5. General discussion and outlook	91
6. Appendix	94
6.1 Abbreviations	94
6.2 Symbols	95
6.3 Acknowledgements	97
7. Bibliography	100
Curriculum vitae	130
