Abstract.....	v
Kurzfassung	vii
List of Tables.....	ix
List of Figures.....	xi
List of Symbols and Acronyms	xv
1. Introduction	1
1.1 Motivation.....	1
1.2 State-of-the-Art.....	3
1.3 Research Objectives.....	6
1.4 Organization of the Thesis.....	6
2. SAR Principles and Polarimetry.....	9
2.1 SAR Remote Sensing	9
2.2 Principles of SAR Imaging.....	9
2.2.1 Backscattering Coefficient.....	12
2.3 Plane Waves.....	12
2.3.1 Polarization State	14

2.4 Polarimetric SAR 16

2.4.1 Scattering Matrix 16

2.4.2 Covariance and Coherency Matrix 17

2.4.3 Symmetry Properties 19

2.5 Polarimetric Decomposition..... 19

2.5.1 Eigen-Based Decomposition 20

2.5.2 Model-Based Decomposition 22

3. Glaciological Concepts 25

3.1 Thermal Regime..... 25

3.2 Mass Balance 25

3.3 Glacier Facies and SAR Backscatter..... 27

3.4 Dielectric Properties of Snow, Firn and Ice 29

3.4.1 Real Part 30

3.4.2 Imaginary Part 31

3.4.3 Structural and Dielectric Anisotropy of Snow and Firn..... 32

4. Modeling Polarimetric Scattering of Glaciers 37

4.1 A Review of Existing Scattering Models..... 37

4.2 Novel Three-Component Glacier Scattering Model 38

4.2.1 Surface Scattering Component 38

4.2.2 Extended Volume Scattering Component 42

4.2.3 Novel Anisotropic Propagation Component 48

4.2.4 Transmittivities..... 56

5. Experimental Data..... 57

5.1 Study Area..... 57

5.2 Ground-Based Measurements 58

5.3	Polarimetric SAR Data	64
5.4	PolSAR Signatures Analysis	64
5.4.1	Temporal Variations	80
6.	Decomposition Results and Validation.....	85
6.1	Polarimetric Decomposition for the Wet-Snow Zone	85
6.2	Polarimetric Decomposition for the Superimposed Ice Zone.....	93
6.3	Decomposition Residuals	100
6.4	Validation of Decomposition Results.....	101
6.4.1	Firn Thickness at Summit.....	102
6.4.2	Firn Thickness at Eton	105
6.5	Temporal Variations	107
6.5.1	Firn Thickness Dynamics	112
7.	Conclusions.....	117
7.1	Summary.....	117
7.2	Contributions	119
7.3	Future Work.....	122
	Bibliography	125
