Foreword xi

Part 0 Preliminaries

Introduction 3

1 Basic Properties of the Fourier Transform

1.1 L^1 -theory 11

1.2 Convolution 13

1.3 L^2 -theory 13

1.4 Summability 14

1.5 Poisson summation formula 16

Part 1 Analytic (and Geometric) Aspects

2 Oscillatory Integrals

2.1 The method of stationary phase 19

2.2 Erdélyi type results 24

2.3 The Fourier transform on a convex set 27

2.4 Applications 34

2.4.1 Hyperbolic means 34

2.4.2 Multiple Fourier integrals 38

2.4.3 Generalized Bochner Riesz means of critical order 42

3 The Fourier Transform of Convex and Oscillating Functions

3.1 Convex functions with singularities 47

3.2 Asymptotic behavior in a wider sense 51

3.3 Integrability of trigonometric series 52

3.4 Analogous function spaces 56

3.5 Asymptotics of the Fourier transform 60

3.5.1 Hardy type spaces 60

3.5.2	The Fourier transform of a function with shifted singularity	70
3.5.3	Amalgam type spaces	77
3.6	Applications and further progress	81
3.7	Multivariate case	84
4	The Fourier Transform of a Radial Function	
4.1	Fractional derivatives and classes of functions	94
4.2	Existence of the Fourier transform and Bessel type functions	99
4.3	Proof of the existence theorem	104
4.4	Passage to a one-dimensional Fourier transform	118
4.5	Certain applications	123
Part 2	Geometric (and Analytic) Aspects	
5	L^2-average Decay of the Fourier Transform of a Characteristic Function of a Convex Set	
5.1	L^2 -average decay	131
5.2	Proof of Theorem 5.5 and Theorem 5.7	131
5.2.1	Decomposition of the boundary	132
5.2.2	Singular directions	132
5.2.3	Non-singular directions	133
6	L^1-average Decay of the Fourier Transform of a Characteristic Function of a Convex Set	
6.1	Preliminary discussion	137
6.2	A variety of arguments	140
6.2.1	L^p -average decay of the Fourier transform	140
6.2.2	Inscribed polygons	141
6.2.3	The image of the Gauss map	142
6.2.4	Comparing the previous arguments	143
6.2.5	A lower bound for all convex bodies	144
6.3	Applications	145
6.3.1	Lattice points	145
6.3.2	Irregularities of distribution	146
6.4	Proofs	147
7	Geometry of the Gauss Map and Lattice Points in Convex Domains	
7.1	Two main results	161
7.2	Examples and preliminary results	163
7.2.1	Examples	163
7.2.2	Estimates for the Fourier transform	164

7.3	Proofs	165
7.3.1	Proof of Theorem 7.1	165
7.3.2	Proof of Theorem 7.2	167
7.3.3	Proof of Theorem 7.8	168
7.3.4	Proof of Theorem 7.9	170
8	Average Decay Estimates for Fourier Transforms of Measures Supported on Curves	
8.1	Statement of results	173
8.2	Upper bounds, I	178
8.3	Upper bounds, II	183
8.4	Upper bounds, III	186
8.5	Asymptotics for oscillatory integrals revisited	189
8.6	Lower bounds	194
	Epilogue	205
	Bibliography	207
	Index	221
