List of Contributors ..... **xi**

1 Preface **1**

Part I Walter Gautschi

2 Biography of Walter Gautschi **5**
Claude Brezinski and Ahmed Sameh

3 A Brief Summary of My Scientific Work and Highlights of My Career **9**
Walter Gautschi

4 Publications **19**
Walter Gautschi

Part II Commentaries

5 Numerical Conditioning **37**
Nicholas J. Higham

5.1 Conditioning of Vandermonde Matrices 37
5.2 Conditioning of Polynomials 39

6 Special Functions **41**
Javier Segura

6.1 Computation of Special Functions 42
6.1.1 Exponential Integrals, Incomplete Gamma Functions, and the Error Function 42
6.1.2 Computing Special Functions by Gaussian Quadrature 44
6.2 Inequalities 45
6.2.1 Orthogonal Polynomials and Their Zeros 45
6.2.2 Gamma Functions 46

Gautschi, Walter 1927- (DE-588)119264315 Verfasser aut
Walter Gautschi

digitalisiert durch
IDS Basel/Bern, im Auftrag der
Schweizerischen Nationalbibliothek

7 Interpolation and Approximation 49
Miodrag M. Spalević

7.1 Attenuation Factors in Practical Fourier Analysis 49
7.2 Padé Approximants Associated with Hamburger Series 50
7.3 Convergence Behavior of Continued Fractions with Real Elements 51
7.4 Moment-preserving Spline Approximation 52
7.5 Convergence of Extended Lagrange Interpolation 53
7.6 Experimental Mathematics Involving Orthogonal Polynomials 53
7.6.1 Jacobi Polynomials 53
7.6.2 Quadrature Formulae 54
7.7 Exotic Weight Functions 54

Part III Reprints

8 Papers on Numerical Conditioning 59

8.1 [16] On Inverses of Vandermonde and Confluent Vandermonde Matrices, *Numer. Math.* 4, 117–123 (1962) 60
8.2 [19] On Inverses of Vandermonde and Confluent Vandermonde Matrices. II, *Numer. Math.* 5, 425–430 (1963) 68
8.3 [43] The Condition of Orthogonal Polynomials, *Math. Comp.* 26, 923–924 (1972) 75
8.4 [45] On the Condition of Algebraic Equations, *Numer. Math.* 21, 405–424 (1973) 78
8.5 [51] Norm Estimates for Inverses of Vandermonde Matrices, *Numer. Math.* 23, 337–347 (1975) 99
8.6 [62] On Inverses of Vandermonde and Confluent Vandermonde Matrices III, *Numer. Math.* 29, 445–450 (1978) 111
8.7 [64] Questions of Numerical Condition Related to Polynomials, in *Symposium on Recent Advances in Numerical Analysis* (C. de Boor and G. H. Golub, eds.), 45–72 (1978) [Revised and reprinted in *MAA Studies in Mathematics 24: Studies in Numerical Analysis* (G. H. Golub, ed.), 140–177, Math. Assoc. America, Washington, DC, 1984.] 118
8.8 [66] The Condition of Polynomials in Power Form, *Math. Comp.* 33, 343–352 (1979) 157
8.9 [83] The Condition of Vandermonde-like Matrices Involving Orthogonal Polynomials, *Linear Algebra Appl.* 52/53, 293–300 (1983) 168
8.10 [110] (with G. Inglese) Lower Bounds for the Condition Number of Vandermonde Matrices, *Numer. Math.* 52, 241–250 (1988) 177
8.11 [118] How (Un)stable Are Vandermonde Systems?, in *Asymptotic and Computational Analysis* (R. Wong, ed.), 193–210, *Lecture Notes Pure Appl. Math.* 124 (1990) 188

8.12 [120] (with A. Córdova and S. Ruscheweyh) Vandermonde Matrices on the Circle: Spectral Properties and Conditioning, *Numer. Math.* 57, 577–591 (1990) 207
8.13 [200] Optimally Scaled and Optimally Conditioned Vandermonde and Vandermonde-like Matrices, *BIT Numer. Math.* 51, 103–125 (2011) 223

9 Papers on Special Functions 247

9.1 [9] Some Elementary Inequalities Relating to the Gamma and Incomplete Gamma Function, *J. Math. and Phys.* 38, 77–81 (1959) 249
9.2 [10] Exponential Integral $\int_1^\infty e^{-xt}\, t^{-n} dt$ for Large Values of n, *J. Res. Nat. Bur. Standards* 62, 123–125 (1959) 255
9.3 [13] Recursive Computation of the Repeated Integrals of the Error Function, *Math. Comp.* 15, 227–232 (1961) 259
9.4 [39] Efficient Computation of the Complex Error Function, *SIAM J. Numer. Anal.* 7, 187–198 (1970) 266
9.5 [47] A Harmonic Mean Inequality for the Gamma Function, *SIAM J. Math. Anal.* 5, 278–281 (1974) 279
9.6 [48] Some Mean Value Inequalities for the Gamma Function, *SIAM J. Math. Anal.* 5, 282–292 (1974) 284
9.7 [49] Computational Methods in Special Functions — A Survey, in *Theory and Applications of Special Functions* (R. A. Askey, ed.), 1–98, *Math. Res. Center, Univ. Wisconsin Publ.* 35 (1975) 296
9.8 [61] Anomalous Convergence of a Continued Fraction for Ratios of Kummer Functions, *Math. Comp.* 31, 994–999 (1977) 395
9.9 [68] A Computational Procedure for Incomplete Gamma Functions, *ACM Trans. Math. Software* 5, 466–481 (1979) 402
9.10 [72] (with F. Costabile) Lower Bounds for the Largest Zeros of Orthogonal Polynomials, *Boll. Un. Mat. Ital.* (5) 17A, 516–522 (1980) (translated from Italian) 419
9.11 [155] The Incomplete Gamma Functions Since Tricomi, in *Tricomi's Ideas and Contemporary Applied Mathematics*, 203–237, *Atti Convegni Lincei* 147 (1998) 428
9.12 [168] Gauss Quadrature Approximations to Hypergeometric and Confluent Hypergeometric Functions, *J. Comput. Appl. Math.* 139, 173–187 (2002) 464
9.13 [169] Computation of Bessel and Airy Functions and of Related Gaussian Quadrature Formulae, *BIT* 42, 110–118 (2002) 480
9.14 [178] Numerical Quadrature Computation of the Macdonald Function for Complex Orders, *BIT Numer. Math.* 45, 593–603 (2005) 490

9.15 [182] (with P. Leopardi) Conjectured Inequalities for Jacobi Polynomials and Their Largest Zeros, *Numer. Algorithms* 45, 217–230 (2007) 502
9.16 [190] On a Conjectured Inequality for the Largest Zero of Jacobi Polynomials, *Numer. Algorithms* 49, 195–198 (2008) 517
9.17 [191] On Conjectured Inequalities for Zeros of Jacobi Polynomials, *Numer. Algorithms* 50, 93–96 (2009) 522
9.18 [192] New Conjectured Inequalities for Zeros of Jacobi Polynomials, *Numer. Algorithms* 50, 293–296 (2009) 527
9.19 [193] How Sharp is Bernstein's Inequality for Jacobi Polynomials?, *Electr. Trans. Numer. Anal.* 36, 1–8 (2009) 532
9.20 [199] The Lambert W-functions and Some of Their Integrals: a Case Study of High-precision Computation, *Numer. Algorithms* 57, 27–34 (2011) 541
9.21 [203] Remark on "New Conjectured Inequalities for Zeros of Jacobi Polynomials by Walter Gautschi, Numer. Algorithms 50: 293–296 (2009)", *Numer. Algorithms* 57, 511 (2011) 550

10 Papers on Interpolation and Approximation 553

10.1 [41] Attenuation Factors in Practical Fourier Analysis, *Numer. Math.* 18, 373–400 (1972) 554
10.2 [86] On Padé Approximants Associated with Hamburger Series, *Calcolo* 20, 111–127 (1983) 583
10.3 [87] On the Convergence Behavior of Continued Fractions with Real Elements, *Math. Comp.* 40, 337–342 (1983) 601
10.4 [89] Discrete Approximations to Spherically Symmetric Distributions, *Numer. Math.* 44, 53–60 (1984) 608
10.5 [100] (with G. V. Milovanović) Spline Approximations to Spherically Symmetric Distributions, *Numer. Math.* 49, 111–121 (1986) 617
10.6 [102] (with M. Frontini and G. V. Milovanović) Moment-preserving Spline Approximation on Finite Intervals, *Numer. Math.* 50, 503–518 (1987) 629
10.7 [132] On Mean Convergence of Extended Lagrange Interpolation, *J. Comput. Appl. Math.* 43, 19–35 (1992) 646
10.8 [147] (with S. Li) On Quadrature Convergence of Extended Lagrange Interpolation, *Math. Comp.* 65, 1249–1256 (1996) 664
10.9 [165] Remark: "Barycentric Formulae for Cardinal (SINC-) Interpolants" by Jean-Paul Berrut, *Numer. Math.* 87, 791–792 (2001) 673
10.10 [202] Experimental Mathematics Involving Orthogonal Polynomials, in *Approximation and Computation — In Honor of Gradimir V. Milovanović* (W. Gautschi, G. Mastroianni, and Th. M. Rassias, eds.), 117–134, *Springer Optim. Appl.* 42 (2011) 676

Contents

List of Contributors xiii

Part I Commentaries

11 Orthogonal Polynomials on the Real Line **3**
Gradimir V. Milovanović

11.1 Three-Term Recurrence Relation 3
11.2 Basic Procedures for Generating the Recursion Coefficients 7
11.2.1 Method of (Modified) Moments 7
11.2.2 Discretization Methods 8
11.2.3 Lanczos Algorithm 8
11.3 Examples of Interesting Classes of Orthogonal Polynomials 8
11.4 Christoffel Modifications of the Measure – Modification Algorithms 11
11.5 Sobolev-type Orthogonal Polynomials 12
11.6 Further Extensions and Applications 14
References 15

12 Polynomials Orthogonal on the Semicircle **17**
Lothar Reichel

12.1 Recurrence Relations for Orthogonal Polynomials 17
12.2 Orthogonal Polynomials on the Semicircle 19
12.3 Extensions and Applications 21
References 21

13 Chebyshev Quadrature **23**
Jaap Korevaar

13.1 Advances in Chebyshev Quadrature 23
13.2 Chebyshev-type Quadratures 24
References 25

14 Kronrod and Other Quadratures **27**
Giovanni Monegato

14.1 Kronrod Rules 27

14.2 Quadratures for Functions Having Singular or Difficult Behaviors ... 31
References ... 33

15 Gauss-type Quadrature ... 35
Walter Van Assche

15.1 Construction of Gauss Quadrature Formulas ... 36
15.2 Gauss–Radau and Gauss–Lobatto Quadrature ... 38
15.3 Error Bounds for Gauss Quadrature ... 41
15.4 Gauss Quadrature for Rational Functions ... 42
15.5 Gauss Quadrature for Special Weights ... 43
15.6 The Circle Theorem for Gauss-type Quadrature ... 47
References ... 49

Part II Reprints

16 Papers on Orthogonal Polynomials on the Real Line ... 53

16.1 [67] On the Preceding Paper "A Legendre Polynomial Integral" by James L. Blue, *Math. Comp.* 33, 742–743 (1979) ... 54
16.2 [75] Minimal Solutions of Three-Term Recurrence Relations and Orthogonal Polynomials, *Math. Comp.* 36, 547–554 (1981) ... 57
16.3 [80] Polynomials Orthogonal with Respect to the Reciprocal Gamma Function, *BIT* 22, 387–389 (1982) ... 66
16.4 [81] On Generating Orthogonal Polynomials, *SIAM J. Sci. Statist. Comput.* 3, 289–317 (1982) ... 70
16.5 [90] On Some Orthogonal Polynomials of Interest in Theoretical Chemistry, *BIT* 24, 473–483 (1984) ... 100
16.6 [145] (with M. Zhang) Computing Orthogonal Polynomials in Sobolev Spaces, *Numer. Math.* 71, 159–183 (1995) ... 112
16.7 [146] Orthogonal Polynomials: Applications and Computation, in *Acta Numerica 1996* (A. Iserles, ed.) 4, 45–119 (1996) ... 138
16.8 [151] On the Computation of Special Sobolev-type Orthogonal Polynomials, in *The heritage of P. L. Chebyshev: a festschrift in honor of the 70th birthday of T. J. Rivlin* (C. A. Michelli, ed.), *Ann. Numer. Math.* 4, 329–342 (1997) ... 215
16.9 [153] (with A. B. J. Kuijlaars) Zeros and Critical Points of Sobolev Orthogonal Polynomials, *J. Approx. Theory* 91, 117–137 (1997) ... 230
16.10 [176] Computing Polynomials Orthogonal With Respect to Densely Oscillating and Exponentially Decaying Weight Functions and Related Integrals, *J. Comput. Appl. Math.* 184, 493–504 (2005) ... 252

16.11 [195] Variable-Precision Recurrence Coefficients for Nonstandard Orthogonal Polynomials, *Numer. Algorithms* 52, 409–418 (2009) ... 265
16.12 [205] Sub-Range Jacobi Polynomials, *Numer. Algorithms* 61, 649–657 (2012) ... 276
16.13 [206] Repeated Modifications of Orthogonal Polynomials by Linear Divisors, *Numer. Algorithms* 63, 369–383 (2013) ... 286
16.14 [207] Neutralizing Nearby Singularities in Numerical Quadrature, *Numer. Algorithms*, DOI 10.1007/s11075-012-9672-9 ... 302

17 Papers on Orthogonal Polynomials on the Semicircle ... 313

17.1 [97] (with G. V. Milovanović) Polynomials Orthogonal on the Semicircle, *J. Approx. Theory* 46, 230–250 (1986) ... 314
17.2 [104] (with H. J. Landau and G. V. Milovanović) Polynomials Orthogonal on the Semicircle. II, *Constructive Approx.* 3, 389–404 (1987) ... 336
17.3 [113] On the Zeros of Polynomials Orthogonal on the Semicircle, *SIAM J. Math. Anal.* 20, 738–743 (1989) ... 353

18 Papers on Chebyshev Quadrature ... 361

18.1 [46] (with H. Yanagiwara) On Chebyshev-type Quadratures, *Math. Comp.* 28, 125–134 (1974) ... 362
18.2 [50] Nonexistence of Chebyshev-type Quadratures on Infinite Intervals, *Math. Comp.* 29, 93–99 (1975) ... 373
18.3 [55] Advances in Chebyshev Quadrature, in *Numerical analysis* (G. A. Watson, ed.), 100–121, Lecture Notes Math. 506 (1976) ... 381
18.4 [58] (with G. Monegato) On Optimal Chebyshev-type Quadratures, *Numer. Math.* 28, 59–67 (1977) ... 404

19 Papers on Kronrod and Other Quadratures ... 415

19.1 [30] Numerical Quadrature in the Presence of a Singularity, *SIAM J. Numer. Anal.* 4, 357–362 (1967) ... 416
19.2 [99] (with F. Calió and E. Marchetti) On Computing Gauss–Kronrod Quadrature Formulae, *Math. Comp.* 47, 639–650 (1986) ... 423
19.3 [103] (with J. Wimp) Computing the Hilbert Transform of a Jacobi Weight Function, *BIT* 27, 203–215 (1987) ... 443
19.4 [107] Gauss–Kronrod Quadrature — A Survey, in *Numerical methods and approximation theory III* (G. V. Milovanović, ed.), 39–66 (1988) ... 457
19.5 [108] (with S. E. Notaris) Newton's Method and Gauss–Kronrod Quadrature, in *Numerical integration III* (H. Brass and G. Hämmerlin, eds.), 60–71, Internat. Ser. Numer. Math. 85 (1988) ... 486

19.6 [109] (with S. E. Notaris) An Algebraic Study of Gauss–Kronrod Quadrature Formulae for Jacobi Weight Functions, *Math. Comp.* 51, 231–248 (1988) 499
19.7 [111] (with T. J. Rivlin) A Family of Gauss–Kronrod Quadrature Formulae, *Math. Comp.* 51, 749–754 (1988) 518
19.8 [114] (with S. E. Notaris) Gauss–Kronrod Quadrature Formulae for Weight Functions of Bernstein–Szegő Type, *J. Comput. Appl. Math.* 25, 199–224 (1989) [Erratum, *ibid.* 27, 429 (1989)] 525
19.9 [128] Quadrature Formulae on Half-Infinite Intervals, *BIT* 31, 438–446 (1991) 552
19.10 [136] On the Computation of Generalized Fermi–Dirac and Bose–Einstein Integrals, *Comput. Phys. Comm.* 74, 233–238 (1993) 562
19.11 [148] (with S. E. Notaris) Stieltjes Polynomials and Related Quadrature Formulae for a Class of Weight Functions, *Math. Comp.* 65, 1257–1268 (1996) 569
19.12 [160] (with W. Gander) Adaptive Quadrature — Revisited, *BIT* 40, 84–101 (2000) 582
19.13 [166] (with J. Waldvogel) Computing the Hilbert Transform of the Generalized Laguerre and Hermite Weight Functions, *BIT* 41, 490–503 (2001) 601
19.14 [204] Numerical Integration Over the Square in the Presence of Algebraic/Logarithmic Singularities With an Application to Aerodynamics, *Numer. Algorithms* 61, 275–290 (2012) 616

20 Papers on Gauss-type Quadrature 633

20.1 [31] Construction of Gauss–Christoffel Quadrature Formulas, *Math. Comp.* 22, 251–270 (1968) 635
20.2 [40] On the Construction of Gaussian Quadrature Rules from Modified Moments, *Math. Comp.* 24, 245–260 (1970) 656
20.3 [84] How and How Not to Check Gaussian Quadrature Formulae, BIT 23, 209–216 (1983) 673
20.4 [85] (with R. S. Varga) Error Bounds for Gaussian Quadrature of Analytic Functions, *SIAM J. Numer. Anal.* 20, 1170–1186 (1983) 682
20.5 [93] (with G. V. Milovanović) Gaussian Quadrature Involving Einstein and Fermi Functions With an Application to Summation of Series, *Math. Comp.* 44, 177–190 (1985). Supplement, *ibid.*, S1–S11 700
20.6 [119] (with E. Tychopoulos and R. S. Varga) A Note on the Contour Integral Representation of the Remainder Term for a Gauss–Chebyshev Quadrature Rule, *SIAM J. Numer. Anal.* 27, 219–224 (1990) 726

20.7 [121] (with S. Li) The Remainder Term for Analytic Functions of Gauss–Radau and Gauss–Lobatto Quadrature Rules With Multiple End Points, *J. Comput. Appl. Math.* 33, 315–329 (1990) 733
20.8 [123] On the Remainder Term for Analytic Functions of Gauss–Lobatto and Gauss–Radau Quadratures, *Rocky Mountain J. Math.* 21, 209–226 (1991) 749
20.9 [126] (with S. Li) Gauss–Radau and Gauss–Lobatto Quadratures With Double End Points, *J. Comput. Appl. Math.* 34, 343–360 (1991) 768
20.10 [137] Gauss-type Quadrature Rules for Rational Functions, in *Numerical integration IV* (H. Brass and G. Hämmerlin, eds.), 111–130, Internat. Ser. Numer. Math. 112 (1993) 787
20.11 [154] (with G. V. Milovanović) *S*-Orthogonality and Construction of Gauss–Turán-type Quadrature Formulae, *J. Comput. Appl. Math.* 86, 205–218 (1997) 808
20.12 [161] (with L. Gori and F. Pitolli) Gauss Quadrature for Refinable Weight Functions, *Appl. Comput. Harmon. Anal.* 8, 249–257 (2000) 823
20.13 [163] High-Order Gauss–Lobatto Formulae, *Numer. Algorithms* 25, 213–222 (2000) 833
20.14 [164] Gauss–Radau Formulae for Jacobi and Laguerre Weight Functions, *Math. Comput. Simulation* 54, 403–412 (2000). [Reprinted in *Computational Science, Mathematics and Software* (R. F. Boisvert and E. Houstis, eds.), 237–248, Purdue Univ. Press, West Lafayette, IN, 2002]. 844
20.15 [167] The Use of Rational Functions in Numerical Quadrature, *J. Comput. Appl. Math.* 133, 111–126 (2001) 855
20.16 [173] Generalized Gauss–Radau and Gauss–Lobatto Formulae, *BIT* 44, 711–720 (2004) 872
20.17 [180] The Circle Theorem and Related Theorems for Gauss-type Quadrature Rules, *Electron. Trans. Numer. Anal.* 25, 129–137 (2006) 883
20.18 [194] High-Order Generalized Gauss–Radau and Gauss–Lobatto Formulae for Jacobi and Laguerre Weight Functions, *Numer. Algorithms* 51, 143–149 (2009) 893
20.19 [198] Gauss Quadrature Routines for Two Classes of Logarithmic Weight Functions, *Numer. Algorithms* 55, 265–277 (2010) 901

29.2 [91] (with J. Wimp) In Memoriam: Yudell L. Luke June 26, 1918 – May 6, 1983, *Math. Comp.* 43, 349–352 (1984) ... 388
29.3 [101] Reminiscences of My Involvement in de Branges's Proof of the Bieberbach Conjecture, in *The Bieberbach conjecture* (A. Baernstein II, D. Drasin, P. Duren, and A. Marden, eds.), 205–211, Proc. Symp. on the Occasion of the Proof, Math. Surveys Monographs 21, American Mathematical Society (1986) ... 393
29.4 [143] The Work of Philip Rabinowitz on Numerical Integration, *Numer. Algorithms* 9, 199–222 (1995) ... 401
29.5 [144] Luigi Gatteschi's Work on Special Functions and Numerical Analysis, in *Special functions* (G. Allasia, ed.), *Annals Numer. Math.* 2, 3–19 (1995) ... 426
29.6 [170] The Interplay Between Classical Analysis and (Numerical) Linear Algebra — A Tribute to Gene H. Golub, *Electron. Trans. Numer. Anal.* 13, 119–147 (2002) ... 444
29.7 [183] Leonhard Eulers Umgang mit langsam konvergenten Reihen, *Elem. Math.* 62, 174–183 (2007) ... 474
29.8 [184] Commentary, by Walter Gautschi, in *Milestones in matrix computation: selected works of Gene H. Golub, with commentaries* (R. H. Chan, Ch. Greif, and D. P. O'Leary, eds.), Ch. 22, 345–358, Oxford University Press (2007) ... 485
29.9 [186] On Euler's Attempt to Compute Logarithms by Interpolation: A Commentary to His Letter of February 16, 1734 to Daniel Bernoulli, *J. Comput. Appl. Math.* 219, 408–415 (2008) ... 500
29.10 [187] Leonhard Euler: His Life, the Man, and His Works, *SIAM Rev.* 50, 3–33 (2008). [Also published in *ICIAM 07, 6th International Congress on Industrial and Applied Mathematics, Zürich, Switzerland, 16–20 July 2007* (R. Jeltsch and G. Wanner, eds.), 447–483, European Mathematical Society, (2009). Chinese translation in *Mathematical Advance in Translation* (2–3) (2008).] ... 509
29.11 [189] (with C. Giordano) Luigi Gatteschi's Work on Asymptotics of Special Functions and Their Zeros, in *A collection of essays in memory of Luigi Gatteschi* (G. Allasia, C. Brezinski, and M. Redivo-Zaglia, eds.), *Numer. Algorithms* 49, 11–31 (2008) ... 541
29.12 [196] Alexander M. Ostrowski (1893–1986): His Life, Work, and Students, in *math.ch/100 Swiss Mathematical Society 1910–2010* (B. Colbois, C. Riedtmann, and V. Schroeder, eds.), 257–278, European Mathematical Society, (2010) ... 563
29.13 [201] My Collaboration with Gradimir V. Milovanović, in *Approximation and computation — in honor of Gradimir V. Milovanović* (W. Gautschi, G. Mastroianni, and Th. M. Rassias, eds.), 33–43, Springer Optim. Appl. 42 (2011) ... 586

30 Papers on Miscellanea **599**

30.1 [71] Families of Algebraic Test Equations, *Calcolo* 16, 383–398 (1979) 600
30.2 [96] (with B. N. Flury) An Algorithm for Simultaneous Orthogonal Transformation of Several Positive Definite Symmetric Matrices to Nearly Diagonal Form, *SIAM J. Sci. Statist. Comput.* 7, 169–184 (1986) 617
30.3 [124] A Class of Slowly Convergent Series and Their Summation by Gaussian Quadrature, *Math. Comp.* 57, 309–324 (1991) 634
30.4 [125] On Certain Slowly Convergent Series Occurring in Plate Contact Problems, *Math. Comp.* 57, 325–338 (1991) 651
30.5 [149] (with J. Waldvogel) Contour Plots of Analytic Functions, Ch. 25 in *Solving problems in scientific computing using Maple and Matlab* (W. Gander and J. Hřebíček, eds.), 3d ed., 359–372, Springer, Berlin, 1997. [Chinese translation by China Higher Education Press and Springer, 1999; Portuguese translation of 3d ed. by Editora Edgard Blücher Ltda., São Paulo, 2001; Russian translation of 4th ed. by Vassamedia, Minsk, Belarus, 2005.] 666
30.6 [175] The Hardy–Littlewood Function: An Exercise in Slowly Convergent Series, *J. Comput. Appl. Math.* 179, 249–254 (2005) 681
30.7 [197] The spiral of Theodorus, numerical analysis, and special functions, *J. Comput. Appl. Math.* 235, 1042–1052 (2010) 688

Part III Werner Gautschi

31 Publications **703**

The Asymptotic Behaviour of Powers of Matrices, *Duke Math. J.* 20, 127–140 (1953) 704
The Asymptotic Behaviour of Powers of Matrices II, *Duke Math. J.* 20, 375–379 (1953) 719
Bounds of Matrices with Regard to an Hermitian Metric, *Compositio Math.* 12, 1–16 (1954) 725
Some Remarks on Systematic Sampling, *Ann. Math. Statist.* 28, 385–394 (1957) 742
Some Remarks on Herbach's Paper, Optimum Nature of the F-Test for Model II in the Balanced Case, *Ann. Math. Statist.* 30, 960–963 (1959) 753

32 Obituaries **759**

A. Ostrowski, "Werner Gautschi 1927–1959", *Verh. Naturf. Ges. Basel* 71, Nr. 2, 314–316 (1960) (English translation by Walter Gautschi) 760
J. R. Blum, "Werner Gautschi 1927–1959", *Ann. Math. Statist.* 31, 557 (1960) 764

33 Recording **767**
Trout Quintet
