

Table of Contents

List of Contributors	IX
About the Guest Editor	XV
Preface	XVII
 Pabulo Henrique Rampelotto	
Extremophiles and Extreme Environments	
Reprinted from: <i>Life</i> 2013 , 3(3), 482-485	
http://www.mdpi.com/2075-1729/3/3/482	1
 Chapter 1: Extremophiles in Extreme Environments	
 Viggó Marteinson, Parag Vaishampayan, Jana Kvidero, Francesca Mapelli, Mauro Medori, Carlo Calfapietra, Angeles Aguilera, Domenica Hamisch, Eyjólfur Reynisson, Sveinn Magnússon, Ramona Marasco, Sara Borin, Abigail Calzada, Virginia Souza-Egipsy, Elena González-Toril, Ricardo Amils, Josef Elster and Robert Hänsch	
A Laboratory of Extremophiles: Iceland Coordination Action for Research Activities on Life in Extreme Environments (CAREX) Field Campaign	
Reprinted from: <i>Life</i> 2013 , 3(1), 211-233	
http://www.mdpi.com/2075-1729/3/1/211	7
 Salvatore Magazù, Federica Migliardo, Miguel A. Gonzalez, Claudia Mondelli, Stewart F. Parker and Beata G. Vertessy	
Molecular Mechanisms of Survival Strategies in Extreme Conditions	
Reprinted from: <i>Life</i> 2012 , 2(4), 364-376	
http://www.mdpi.com/2075-1729/2/4/364	30
 Kate Montgomery, James C. Charlesworth, Rebecca LeBard, Pieter T. Visscher and Brendan P. Burns	
Quorum Sensing in Extreme Environments	
Reprinted from: <i>Life</i> 2013 , 3(1), 131-148	
http://www.mdpi.com/2075-1729/3/1/131	43

Susana E. Jorge-Villar and Howell G.M. Edwards

Microorganism Response to Stressed Terrestrial Environments: A Raman Spectroscopic
Perspective of Extremophilic Life Strategies

Reprinted from: *Life* **2013**, 3(1), 276-294

<http://www.mdpi.com/2075-1729/3/1/276> 62

Yukari Maezato and Paul Blum

Survival of the Fittest: Overcoming Oxidative Stress at the Extremes of Acid, Heat and Metal

Reprinted from: *Life* **2012**, 2(3), 229-242

<http://www.mdpi.com/2075-1729/2/3/229> 81

Dennis A. Bazylinski and Christopher T. Lefèvre

Magnetotactic Bacteria from Extreme Environments

Reprinted from: *Life* **2013**, 3(2), 295-307

<http://www.mdpi.com/2075-1729/3/2/295> 95

David Bierbach, Matthias Schulte, Nina Herrmann, Claudia Zimmer,

Lenin Arias-Rodriguez, Jeane Rimber Indy, Rüdiger Riesch and Martin Plath

Predator Avoidance in Extremophile Fish

Reprinted from: *Life* **2013**, 3(1), 161-180

<http://www.mdpi.com/2075-1729/3/1/161> 109

Chapter 2: Extremophiles in Specific Environments**Francesco Canganella and Juergen Wiegel**

Anaerobic Thermophiles

Reprinted from: *Life* **2014**, 4(1), 77-104

<http://www.mdpi.com/2075-1729/4/1/77> 131

Olalla López-López, María Esperanza Cerdán and María Isabel González-Siso

Hot Spring Metagenomics

Reprinted from: *Life* **2013**, 3(2), 308-320

<http://www.mdpi.com/2075-1729/3/2/308> 160

Angeles Aguilera

Eukaryotic Organisms in Extreme Acidic Environments, the Río Tinto Case

Reprinted from: *Life* **2013**, 3(3), 363-374

<http://www.mdpi.com/2075-1729/3/3/363> 173

Catherine M. Kay, Owen F. Rowe, Laura Rocchetti, Kris Coupland, Kevin B. Hallberg and D. Barrie Johnson

Evolution of Microbial “Streamer” Growths in an Acidic, Metal-Contaminated Stream
Draining an Abandoned Underground Copper Mine

Reprinted from: *Life* **2013**, 3(1), 189-210

<http://www.mdpi.com/2075-1729/3/1/189> 186

Ali Tahrioui, Melanie Schwab, Emilia Quesada and Inmaculada Llamas

Quorum Sensing in Some Representative Species of *Halomonadaceae*

Reprinted from: *Life* **2013**, 3(1), 260-275

<http://www.mdpi.com/2075-1729/3/1/260> 208

Virginia P. Edgcomb and Joan M. Bernhard

Heterotrophic Protists in Hypersaline Microbial Mats and Deep Hypersaline Basin
Water Columns

Reprinted from: *Life* **2013**, 3(2), 346-362

<http://www.mdpi.com/2075-1729/3/2/346> 224

Andrea Legat, Ewald B. M. Denner, Marion Dornmayr-Pfaffenhuemer, Peter Pfeiffer, Burkhard Knopf, Harald Claus, Claudia Gruber, Helmut König, Gerhard Wanner and Helga Stan-Lotter

Properties of *Halococcus salifodinae*, an Isolate from Permian Rock Salt Deposits, Compared with Halococci from Surface Waters

Reprinted from: *Life* **2013**, 3(1), 244-259

<http://www.mdpi.com/2075-1729/3/1/244> 241

Inga Hänelt and Volker Müller

Molecular Mechanisms of Adaptation of the Moderately Halophilic Bacterium *Halobacillus halophilus* to Its Environment

Reprinted from: *Life* **2013**, 3(1), 234-243

<http://www.mdpi.com/2075-1729/3/1/234> 257

Chapter 3: Structure and Function of Extremophilic Biomolecules

Ken F. Jarrell, Yan Ding, Divya B. Nair and Sarah Siu

Surface Appendages of Archaea: Structure, Function, Genetics and Assembly

Reprinted from: *Life* **2013**, 3(1), 86-117

<http://www.mdpi.com/2075-1729/3/1/86> 269

Nikki Dellas, C. Martin Lawrence and Mark J. Young

A Survey of Protein Structures from Archaeal Viruses

Reprinted from: *Life* **2013**, 3(1), 118-130<http://www.mdpi.com/2075-1729/3/1/118>302**Ikuo Matsui, Eriko Matsui, Kazuhiko Yamasaki and Hideshi Yokoyama**

Domain Structures and Inter-Domain Interactions Defining the Holoenzyme Architecture of Archaeal D-Family DNA Polymerase

Reprinted from: *Life* **2013**, 3(3), 375-385<http://www.mdpi.com/2075-1729/3/3/375>315**Aharon Oren**

The Function of Gas Vesicles in Halophilic Archaea and Bacteria: Theories and Experimental Evidence

Reprinted from: *Life* **2013**, 3(1), 1-20<http://www.mdpi.com/2075-1729/3/1/1>327**Makoto Ashiuchi, Takashi Yamamoto and Tohru Kamei**

Pivotal Enzyme in Glutamate Metabolism of Poly-g-Glutamate-Producing Microbes

Reprinted from: *Life* **2013**, 3(1), 181-188<http://www.mdpi.com/2075-1729/3/1/181>348**María de Lourdes Moreno, Dolores Pérez, María Teresa García and****Encarnación Mellado**

Halophilic Bacteria as a Source of Novel Hydrolytic Enzymes

Reprinted from: *Life* **2013**, 3(1), 38-51<http://www.mdpi.com/2075-1729/3/1/38>356**Alessio Ausili, Maria Staiano, Jonathan Dattelbaum, Antonio Varriale,****Alessandro Capo and Sabato D'Auria**Periplasmic Binding Proteins in Thermophiles: Characterization and Potential Application of an Arginine-Binding Protein from *Thermotoga maritima*: A Brief Thermo-StoryReprinted from: *Life* **2013**, 3(1), 149-160<http://www.mdpi.com/2075-1729/3/1/149>370

**Abraham A. M. Bielen, Marcel R. A. Verhaart, John van der Oost and
Servé W. M. Kengen**

Biohydrogen Production by the Thermophilic Bacterium *Caldicellulosiruptor saccharolyticus*:
Current Status and Perspectives

Reprinted from: *Life* **2013**, 3(1), 52-85

<http://www.mdpi.com/2075-1729/3/1/52> 382
