

# **Index**

<b>Index</b>	<b>3</b>
<b>Abstract</b>	<b>5</b>
<b>Hypothesis and aim of the thesis</b>	<b>7</b>
<b>Introduction</b>	<b>8</b>
<b>1. T lymphocytes</b>	<b>9</b>
<b>1.1 T cell development in the thymus</b>	<b>9</b>
<b>1.2 Signaling pathways in T cell activation</b>	<b>12</b>
<b>1.3 T cell subsets</b>	<b>17</b>
<b>1.3.1 Th1</b>	<b>17</b>
<b>1.3.2 Th2</b>	<b>18</b>
<b>1.3.3 Th9</b>	<b>18</b>
<b>1.3.4 Th17</b>	<b>19</b>
<b>1.3.5 Treg</b>	<b>21</b>
<b>1.3.6 T follicular helper (Tfh) cells</b>	<b>22</b>
<b>1.4 Memory T cells</b>	<b>24</b>
<b>1.5 Antigen and cytokines driven proliferation</b>	<b>26</b>
<b>2. Regulatory mechanisms in CD4 cell function</b>	<b>28</b>
<b>2.1 T cell exhaustion</b>	<b>28</b>
<b>2.2 T cell anergy</b>	<b>29</b>
<b>2.3 T cell senescence</b>	<b>32</b>
<b>2.4 Metabolic reprogramming of CD4 cells</b>	<b>34</b>
<b>2.5 T cell autophagy</b>	<b>38</b>

3. T cell in tumors	43
3.1 Anti-tumor activity of CD4 and CD8 T cells	43
3.2 Neo-antigen driven Vs homeostatic expansion in tumors	45
3.3 Immunoregulatory mechanisms in the tumor microenvironmnet	47
4. Purine nucleotides as extracellular signaling molecules	52
4.1 Purinergic signaling	52
4.2 The P2X7 receptor	54
Papers	58
Discussion	139
