Abstract	1
Abbreviation	3
1 The immune system	7
1.1 The innate immune system	11
1.2 The adaptive immune system	13
1.3 T follicular helper cells	16
1.4 The germinal center reaction	20
1.5 Mechanisms of immune tolerance	23
2 Purinergic receptors in the regulation of immune system	27
2.1 The Purinergic receptors families: P1 and P2 receptors.	32
2.2 Ectonucleotidases as a bridge between P1 and P2 receptor activation: relevance to immune homeostasis control.	35
2.3 The P2X7 receptor: structure and function in the immune system	39
2.4 P2X7 receptor activity in the regulation of T follicular helper cells	48
2.5 P2X7 polymorphisms in pathological conditions	50
3 Immunodeficiencies and Autoimmunity	51
4 Systemic lupus erythematosus (SLE)	53
4.1 Pathogenic mechanisms in SLE	63
4.2 Murine models of SLE	67
4.3 Role of Tfh cells in SLE	76
Aim of the study	82

Papers	84
Discussion	147
