Abstract I

Table of contents II

AcknowledgementsIV

AbbreviationsV

1 Introduction 1

1.1 Neurodegenerative diseases1

1.3 The cerebellum.....5

 1.3.1 The cerebellum: Function5

 1.3.2 The cerebellum: architecture and circuit6

1.4 Autosomal dominant cerebellar ataxias (ADCAs).....9

 1.4.1 ADCAs: Clinical features and neuropathology9

 1.4.2 ADCAs: Epidemiology9

 1.4.3 ADCAs: Molecular genetics and pathological mechanisms 10

1.6 Spinocerebellar ataxia type 1 (SCA1)..... 14

 1.6.1 SCA1: Clinical features..... 14

 1.6.2 SCA1: neuropathology..... 15

 1.6.3 SCA1: Epidemiology 18

 1.6.4 SCA1: Molecular genetics 18

 1.6.5 SCA1: ATXN1, the mutant protein 20

 1.6.6 SCA1: Mouse models 23

 1.6.7 SCA1: Pathological mechanisms..... 26

1.8 The mitochondrion 32

 1.8.1 Structure of the mitochondrion..... 32

 1.8.2 Mitochondrial dynamics 34

 1.8.3 Mitochondrial functions in neurons 37

1.8.4	ETC and OXPHOS	42
1.8.5	Oxidative stress	44
1.8.6	Mitochondrial impairments and oxidative stress contribute to neuronal disorders	47
1.8.7	Mitochondria-targeted therapies	55
2	Aims of the thesis	59
3	Results presented as scientific publication	61
3.1	Abstract	62
3.2	Introduction	63
3.3	Experimental procedures	66
3.4	Results	71
3.5	Discussion	84
3.6	Author contributions	89
3.7	Acknowledgements	89
3.8	Funding	89
3.9	Supplementary Figures and Tables	90
3.10	References	96
4	Conclusions and perspectives	102
5	References	109
	Curriculum vitae	125
	Declaration of Originality	127
