

Table of Contents

1. GENERAL INTRODUCTION 1

1.1. Normal hematopoiesis 1

1.1.1. Regulation of myelopoiesis by cytokines and retinoic acids 2

1.1.2. Transcriptional regulation of myelopoiesis 2

1.2. Acute myeloid leukemia 7

1.2.1. Classification of AML 7

1.2.2. Acute promyelocytic leukemia (APL) 9

1.2.3. Treatment of AML 9

1.3. Autophagy 10

1.3.1. General function of autophagy 11

1.3.2. Core machinery of canonical autophagy pathway 14

1.3.3. Non-canonical autophagy pathway 16

1.3.4. Methods to monitor autophagy 17

1.3.5. Autophagy and cancer 18

2. AIM OF THE STUDY 21

3. RESULTS 22

3.1. ATG gene regulation and the effects of low ATG gene levels on AML differentiation 22

3.1.1. Introduction 22

3.1.2. Manuscript 24

3.2. ATG16L1 and ATG16L2 play different roles in starvation- and ATRA-induced autophagy in APL cells 45

3.2.1. Introduction 45

3.2.2. Manuscript 47

4. OVERALL DISCUSSION AND CONCLUSIONS 66

4.1. The role autophagy in neutrophil differentiation and survival 66

4.2. ATG16L2 mediated non-canonical autophagy during APL differentiation 69

4.3. Autophagy and AML treatment 71

5. OUTLOOK 73

5.1. Autophagy in AML neutrophil differentiation and pathology 73

5.2. The mechanism of ATG16L2-dependent autophagy during ATRA-induced differentiation	74
6. CO-AUTHOR PUBLICATIONS	77
6.1. Linking the SUMO protease SENP5 to neutrophil differentiation of AML cells	77
6.1.1. Goal and own contribution	77
6.1.2. Article	78
6.2. Human DMTF1 β antagonizes DMTF1 α regulation of the p14 ^{ARF} tumor suppressor and promotes cellular proliferation.....	82
6.2.1. Goal and own contributions.....	82
6.2.2. Article	83
7. PUBLICATIONS	97
