INTRODUCTION	11
I. PARAMYXOVIRIDAE TAXONOMY	13
II. THE VIRUS	13
i. Virus particle	13
ii. Virus life cycle	15
iii. Virus genome	17
iv. Replication	19
v. CDV strains	20
III. CDV PATHOGENESIS	21
vi. Clinical signs	21
vii. Tissue tropism	22
viii. Neurological disease	23
ix. CDV host range	25
IV. CELL EXIT	27
x. Actin	27
xi. The matrix protein	30
• M: Structure	35
• M: virus assembly	38
• M Post-translational modification: Ubiquitination	43
• M: Membrane scission	45
xii. Conclusion	46
V. CELL ENTRY	51
xiii. F protein	53
xiv. H protein	55
xv. Membrane fusion	57
AIMS OF THE THESIS	59
VI. PRIMARY AIM	59
VII. MAIN CONTRIBUTIONS	60
VIII. ADDITIONAL CONTRIBUTION	61

RESULTS _____ **63**

IX. **MEMBRANE BUDDING REGULATED BY A CRITICAL RESIDUE LOCATED AT THE PUTATIVE DIMERIC INTERFACE OF THE CANINE DISTEMPER VIRUS MATRIX PROTEIN** _____ **65**

X. **SLAM- AND NECTIN-4-INDEPENDENT NONCYTOLYTIC SPREAD OF CANINE DISTEMPER VIRUS IN ASTROCYTES** _____ **101**

XI. **CANINE DISTEMPER VIRUS FUSION ACTIVATION: CRITICAL ROLE OF RESIDUE E123 OF CD150/SLAM** _____ **111**

XII. **CANINE DISTEMPER VIRUS ENVELOPE PROTEIN INTERACTIONS MODULATED BY HYDROPHOBIC RESIDUES IN THE FUSION PROTEIN GLOBULAR HEAD** _____ **127**

XIII. **SEQUENTIAL CONFORMATIONAL CHANGES IN THE MORBILLIVIRUS ATTACHMENT PROTEIN INITIATE THE MEMBRANE FUSION PROCESS** _____ **135**

CONCLUSION _____ **163**

OUTLOOK _____ **166**

XIV. **SURFACE EXPOSED LYSINES AND ARGININES INVOLVED IN M PERIPHERY ACCUMULATION** _____ **166**

XV. **M INTERACTOME** _____ **167**

XVI. **VIRUS ENGINEERING** _____ **167**

XVII. **VIRAL ONCOLYSIS** _____ **168**

APPENDIX _____ **170**

SELECTED REFERENCES _____ **174**

CURRICULUM VITAE _____ **200**

LIST OF PUBLICATIONS _____ **202**

AKNOWLEDGMENTS _____ **203**

DECLARATION OF ORIGINALITY _____ **204**
