

Table of contents

Abstract	11
Zusammenfassung	15
Introduction	19
Global environmental change	19
Forests and the global environmental change	19
Tree water relations and changing water availability	21
Prevailing methods to assess tree water relations of trees	22
Introduction to stable isotopes of water	24
Thesis outline	25
References	27
 Chapter 1	 33
Temperate tree species show identical response in tree water deficit but different sensitivities in sap flow to summer soil drying	33
Abstract	34
Introduction	34
Materials and methods	37
Results	41
Discussion	43
Acknowledgements	48
References	48

Table of contents

Chapter 2	61
Species-specific differences in water uptake depth of mature temperate trees vary with availability in the soil	61
Summary	62
Introduction	63
Materials and methods	65
Results	68
Discussion	70
Acknowledgements	74
References	75
 Chapter 3	 89
Employing $\delta^2\text{H}$ and $\delta^{18}\text{O}$ values to estimate mean residence time and temporal origin of soil and xylem water in a temperate forest	89
Abstract	90
Introduction	90
Materials and methods	92
Results	99
Discussion	102
Acknowledgements	106
References	106
Discussion	127
Implications and conclusions	132
References	135
Acknowledgements	141
Curriculum Vitae	145
