

Contents

Part I: Introduction	1
1 Summary of research papers	2
2 Acknowledgements	4
Part II: Research papers	6
Credit Default Swap Spreads and Implied Cost of Equity	7
1 Introduction	8
2 Linkage between cost of equity and cost of debt	10
3 Structural framework	11
4 Empirical strategy	16
5 Data	23
6 Results	28
7 Robustness test	32
8 Conclusions	33
Appendices	34
A Valuation models	34
Capital allocation in large banks - a renewed look at practice	48
1 Introduction	49

2 Capital allocation - a primer	52
3 Problem	56
4 Simulation	57
5 Capital allocation models	62
6 Evaluation method and simulated sample	70
7 Model performance	74
8 Conclusions	78
Appendices	79
A Proofs	79

How do banks adapt their asset holdings to binding leverage ratio and liquidity requirements under Basel III?	98
1 Introduction	99
2 Model	105
3 Risk-based capital requirement	108
4 Leverage ratio requirement	114
5 Calibration	120
6 Cost of capital	129
7 Liquidity requirements	131
8 Conclusions	140
Appendices	142

A	Solution of optimization problems	142
B	Proofs	155
Part III:	Curriculum vitae	161
