

Table of Contents

Abbreviations	3
Summary	4
Zusammenfassung	5
1. Introduction	7
1.1 ATP-binding cassette (ABC) transporter family	7
1.2 ABC importers	12
1.3 The vitamin B12 transporter BtuCD-F in <i>E. coli</i>	17
1.4 Open questions and aim of the thesis	20
2. Structural and functional investigation of BtuCD-F as transporter of cobinamide	25
3. Probing the BtuCD translocation pathway by mutagenesis and functional studies	52
4. Structural basis of BtuF inhibition by conformational nanobodies	68
5. Conclusions and outlook	89
Curriculum Vitae	94
Acknowledgements	95
Appendix: Two approaches for structural studies of BtuCD-F in distinct states	96
I Antibody fragment targeting of BtuF	97
II Disulfide cross-linking of BtuF to BtuC	111
