1. INTRODUCTION	1
2. LITERATURE REVIEW	5
1. Guarantee valuation	5
2. Deposit insurance valuation	8
3. Control of guarantees	9
4. Other applications	11
3. ELEMENTS OF OPTIMAL CONTROL	15
1. Optimal deterministic control	15
2. Optimal stochastic control	18
3. Stochastic impulse control	21
4. THE MODEL	25
1. The underlying process behavior	26
2. Cost of credit risk	28
3. Cost of information	29
4. Forms of control	31
5. Solution Approaches	31
5. FULL-OBSERVATION CASE	33
1. The decision process	34
2. "Single jump" operator approach	36
3. QVI approach	36
6. PARTIAL OBSERVATION CASE	41
1. The decision process	41
2. QVI approach	43
7. NUMERICAL APPROACHES	49
8. SIMULATION EXPERIMENTS	55

1.	Changes in parameters	55
1.1	Impact of volatility changes	56
1.2	Impact of interest-rate changes	56
2.	Changes in the cost function	57
2.1	Increase in fixed costs	58
2.2	Increase in variable costs	58
2.3	(A)Symmetric cost functions	59
2.4	Compensation between f and c	59
9.	CONCLUSIONS	71
10.	APPENDIX: PRACTICAL CASES	73
1.	Guarantees in a private setting	73
2.	Guarantees in a public setting	78
