Résumé	1
Abstract	3
Remerciements	5
General Introduction	9
Chapter 1: Slowly but surely: gradual diversification and phenotypic evolution in the hyper-diverse tree fern family Cyatheaceae	26
Chapter 2: Genome skimming reveals ancient Andean - Atlantic Forest disjunction and widespread hybrid speciation in core Tillandsioideae	63
Chapter 3: Targeted capture of hundreds of nuclear genes unravels phylogenetic relation- ships of the diverse Neotropical palm tribe Geonomateae	104
Chapter 4: Diversification, biogeographic history and mode of speciation in <i>Geonoma</i> (Arecaceae)	155
Conclusions and perspectives	190
Appendices	200
Annexe 1	201
Annexe 2	216
Annexe 3	223
