ABSTRACT	7
ZUSAMMENFASSUNG	9
1 FIXING THE NETWORK: ARE DEVELOPMENTAL SPROUTING MECHANISMS REACTIVATED AFTER A SPINAL CORD INJURY?	11
1.1 Introduction	12
1.2 Anatomical and functional evidence for collateral sprouting after spinal cord injury	13
1.2.1 Classification of sprouting depending on the function of sprouts	14
1.2.2 Classification of sprouting depending on the site of growth	16
1.3 Molecular basis of sprouting of the corticospinal tract; development versus spinal cord injury	16
1.3.1 Different phases of sprouting	17
1.3.2 Growth induction of sprouts	17
1.3.3 Elongation of sprouts	31
1.3.4 Target interaction of sprouts	34
1.3.5 Maturation of sprouts	39
1.4 Conclusion and future directions	45
2 AIMS OF THIS THESIS	47
3 TIME COURSE OF SPONTANEOUS CORTICOSPINAL REMODELING AFTER THORACIC SPINAL CORD INJURY IN RATS	51
3.1 Abstract	52
3.2 Introduction	53
3.3 Methods	54
3.3.1 Time course of reorganization of axotomized hindlimb corticospinal motoneurons	59

3.3.2	Time course of transcriptional changes in the cervical target region of sprouting hindlimb corticospinal axons	62
3.3.3	Time course of resting state MRI following a thoracic SCI	65
3.4	Results	68
3.4.1	Time course of reorganization of the projections of axotomized hindlimb corticospinal motoneurons	68
3.4.2	Time course of transcriptional changes in the cervical target region of sprouting hindlimb corticospinal axons	76
3.4.3	Time course of resting state MRI following a thoracic SCI	82
3.5	Discussion	86
3.6	Conclusion	89
4	CORTICAL EXPRESSION OF DEVELOPMENTAL GENES IN ADULT RATS WITH A THORACIC SPINAL CORD INJURY	91
4.1	Abstract	92
4.2	Introduction	93
4.3	Methods	94
4.3.1	Expression of candidate genes in developing rat sensorimotor cortex	97
4.3.2	Expression of developmental candidate genes in adult rat sensorimotor cortex after a spinal cord injury	98
4.4	Results	103
4.4.1	Expression of candidate genes in developing rat sensorimotor cortex	103
4.4.2	Expression of developmental candidate genes in adult rat sensorimotor cortex after a spinal cord injury	107
4.5	Discussion	112
4.6	Conclusion	115
5	FINAL CONCLUSIONS AND FURTHER DIRECTIONS	117
6	ACKNOWLEDGEMENTS	123
7	BIBLIOGRAPHY	125
