Abstract i

Zusammenfassung iii

Introduction xix

1. Beyond Magnetic Dipole Order in Magnetoelectrics 1
   1.1. Magnetoelectrics and Multiferroics 2
   1.2. Magnetoelectric Multipoles 4

2. Measurement and Computational Techniques 9
   2.1. X-ray based Experimental Techniques 9
      2.1.1. Structure and Long-Range Order : X-ray Diffraction 10
      2.1.2. Electronic Information : X-ray Absorption Spectroscopy . . 11
      2.1.3. Resonant X-ray Diffraction 12
      2.1.4. Resonant X-ray Diffraction : Theory 15
   2.2. Synchrotron X-ray Sources 19
      2.2.1. Soft X-Ray Diffraction : Instrumentation 20
   2.3. First-Principles Calculations 22

3. Resonant X-ray Diffraction on $Ba_3TaFe_3Si_2O_{14}$ under Zero-Field 27
   3.1. Multiferroic Langasites 28
      3.1.1. Crystal and Magnetic Structure 28
      3.1.2. Deviations from the Perfect Helix and Ferroelectricity 31
   3.2. Resonant X-ray Diffraction Experiments 33
      3.2.1. Basic Observations 35
      3.2.2. Description of Satellite Reflections 39
   3.3. Symmetry under Zero Field Conditions 43
      3.3.1. Energy Dependence of Satellites 44
      3.3.2. Threefold Symmetry Breaking 45
      3.3.3. Structural Incommensurability 46
      3.3.4. Core-Hole Interference 47
   3.4. First-Principles Calculations 47
      3.4.1. Construction of a Magnetic *Supercell* 47
      3.4.2. Spectral Shapes at the Fe L_3 Edge 48

3.4.3. Spectral Shape at the Oxygen K Edge 54
3.5. Conclusions 55

4. Resonant X-ray Diffraction on $Ba_3TaFe_3Si_2O_{14}$ under High Magnetic Fields 57
4.1. Experiment and Observations 57
4.1.1. Experimental Details 57
4.1.2. Field Dependence of $(0, 0, \tau)$ for $\mu_0\mathbf{H} < 4$ T 58
4.1.3. Field Dependence of $(0, 0, \tau)$ for 4 T $< \mu_0\mathbf{H} <$ 7 T 59
4.1.4. Temperature Dependence of $(\pm\delta, 0, \tau)$ for $\mu_0\mathbf{H} > 4$ T 60
4.1.5. Field Dependence of $(0, 0, 2\tau)$ for 4 T $< \mu_0\mathbf{H} <$ 7 T 61
4.1.6. $(0, 0, 3\tau)$ at $\mu_0\mathbf{H} = 7$ T 63
4.1.7. H-T Phase Diagram of $Ba_3TaFe_3Si_2O_{14}$ 63
4.2. Discussion of Magnetic Symmetry and Ferroelectricity 64
4.2.1. Magnetic Structure under Applied Fields 64
4.2.2. Microscopic Model for Ferroelectricity 66
4.2.3. Topological Order in the High-Field Phase 67
4.3. Conclusions 68

5. Experiments on h-$YMnO_3$ 71
5.1. h-$YMnO_3$ - Crystal and Magnetic Structure 71
5.2. Resonant X-ray Diffraction on h-$YMnO_3$: Experiment and Observations 72
5.2.1. Origin of the $(0, 0, 1)$ Bragg Reflection 73
5.2.2. Spectral Shape of the $(0, 0, 1)$ Reflection 75
5.3. Multipole Picture for the Spectral Shape Anomaly 77
5.4. Discussion and Summary 81
5.4.1. Magnetic Symmetry of h-$YMnO_3$ 81
5.4.2. Observation of Magnetoelectric Multipoles 84
5.4.3. Temperature Dependence of Magnetoelectric Multipoles . . 85
5.4.4. Summary 86

Concluding Remarks and Outlook 87

A. Absorption Correction 93

B. Calculation of In-Plane Magnetic-Moment in $Ba_3TaFe_3Si_2O_{14}$ 95

C. Input Files for FDMNES Calculations 97
