

## Table of Contents

Summary	i
Résumé	iii
1. Introduction	1
1.1 The significance of perennial ryegrass	1
1.2 Perennial ryegrass breeding	1
1.3 Doubled haploid production	2
1.4 Microspore embryogenesis	3
1.5 Thesis outline	8
2. Haploid and doubled haploid techniques in perennial ryegrass ( <i>Lolium perenne</i> L.) to advance research and breeding	11
Abstract	12
2.1 Introduction	13
2.2 Haploids and doubled haploids: their production and use in breeding and research	14
2.3 Perennial ryegrass	15
2.4 Future applications of haploid and doubled haploid techniques in perennial ryegrass	18
2.5 Doubled haploids for hybrid breeding	22
2.6 Concluding remarks	23
3. Efficient doubled haploid production in perennial ryegrass ( <i>Lolium perenne</i> L.)	25
Abstract	26
3.1 Introduction	27
3.2 Material and Methods	27
3.3 Results and Discussion	28
3.4 Conclusions	29
4. Inheritance patterns of the response to in vitro doubled haploid induction in perennial ryegrass ( <i>Lolium perenne</i> L.)	31
Abstract	32
4.1 Introduction	33
4.2 Materials and Methods	34
4.3 Results	36
4.4 Discussion	41
4.5 Concluding remarks	44
5. Genetic loci governing androgenic capacity in perennial ryegrass ( <i>Lolium perenne</i> L.)	45
Abstract	46
5.1 Introduction	47
5.2 Materials and Methods	48
5.3 Results	51
5.4 Discussion	56
6. Synthesis	61
6.1 Doubled haploid induction in perennial ryegrass ( <i>Lolium perenne</i> L.)	61
6.2 Characteristics of the anther culture derived doubled haploids	63
6.3 Isolated microspore culture of perennial ryegrass	64
6.4 Key requirements for perennial ryegrass hybrid breeding	66
6.5 Concluding remarks	68
7. References	69
8. Supplementary information	88
8.1 Supplementary information for chapter 1	88
8.2 Supplementary information for chapter 4	96
8.3 Supplementary information for chapter 5	98
9. Acknowledgements	108
10. Curriculum Vitae	109
