

Contents

1 Introduction	1
1.1 An Illustrative Example	1
1.2 Credit and Liquidity Risk in Interest Rate Markets	2
1.3 Outline of the Thesis	4
1.4 Some Remarks on the Notation and Terms	5
2 Key Concepts	7
2.1 The FX-like Approach	7
2.2 Challenges of the FX-like Venture	11
2.3 Credit and Liquidity Risk Terminology	13
2.4 Building Blocks of the FX-like Approach	14
2.4.1 The Fundamental Relation and the Spread Factors	14
2.4.2 The Forward Recovery Rate	15
2.4.3 The Recovery Rate	16
2.4.4 The Foreign Market	17
2.5 Absence of Arbitrage	18
2.6 Change of Numéraire and Forward Measures	20
2.7 Numéraires and Bubbles	23
2.8 Modelling Asset Liquidity	25
2.9 Multiple Yield Curves	28
3 Applications of the FX-like Approach	31
3.1 Simple Parametric Models	31
3.2 Partial Observability of the Recovery Rate	41
3.3 Arbitrage-free Interpolation	52
4 Mathematical Foundation	59
4.1 Föllmer Measures	59
4.2 Arbitrage Theory for Small Financial Markets	64

5 The Enhanced FX-like Setting	73
5.1 Motivation	73
5.2 The Illiquidity Premium in Small Financial Markets	75
5.3 Stochastic Basis of the Enhanced FX-like Setting	77
5.4 The Illiquidity Premium in the Enhanced FX-like Setting	81
5.4.1 Model of the 1st Kind	83
5.4.2 Model of the 2nd Kind	84
5.4.3 Model of the 3rd Kind	93
5.4.4 Model of the 4th Kind	93
5.5 The Enhanced FX-like Setting in a Nutshell	94
6 HJM-Framework	97
6.1 The Setup	97
6.2 The HJM-Drift-Condition	101
6.3 Singular Filtering Problem	106
6.4 Forward Measures	110
6.5 The Enhanced FX-like Setting	112
7 The Interbank Market under the FX-like Approach	117
7.1 The Conceptual Basis	117
7.2 Money Market Rates and Instruments	120
7.2.1 LIBOR Rates	120
7.2.2 Forward LIBOR Rates in the Pre-Crisis Interbank Market	121
7.2.3 Forward LIBOR Rates in the Post-Crisis Interbank Market	125
7.2.4 Swap Rates	126
7.2.5 OIS Rates	129
7.2.6 CDS Spreads	130
7.2.7 The Term Structure of Interbank Risk	132
7.2.8 The Treasury Market	134
7.3 FX-like Pre-Crisis Market Model	135
7.3.1 Preparatory Calculations	135
7.3.2 Discrete Tenor Case	136
7.3.3 Continuous Tenor Case	141
7.4 FX-like Post-Crisis Market Model	142
7.4.1 Preparatory Calculations	142
7.4.2 Discrete Tenor Case	145
7.4.3 Continuous Tenor Case	147
8 Conclusion	149
8.1 Major Achievements	149
8.2 Outlook	149
8.3 Schematic Overview	149

A	Classical Credit Risk Models in the light of the FX-like Approach	151
A.1	Classical Structural Models	151
A.1.1	Binary Approach	152
A.1.2	Economic Mixed Approach	152
A.1.3	The Instantaneous Forward Rates	153
A.2	Reduced-Form Modelling of Default	156
A.2.1	Doubly-Stochastic Model	156
A.2.2	Multiple Default Model and Fractional Recovery	161
A.3	Credit Derivatives in the FX-like Approach	164
A.3.1	Zero-Coupon Credit Linked Notes (CLNs)	164
A.3.2	Zero-Coupon Contingent Convertibles (CoCos)	166
A.3.3	Equitable CoCos with Conversion Only at Maturity	168
A.3.4	Equitable CoCos with Conversion At First Passage Time	174
A.3.5	Convertible Loans	175
B	Useful Auxiliary Results	177
B.1	First Passage Time of a Brownian Motion with Drift	177
B.2	Hitting Time of Zero for the CEV Process	178
C	Affine Term Structure Models	179
C.1	The Methodology of Parameterised Term Structure Models	179
C.2	One-Factor Affine Short Rate Models	182
C.3	Multi-Factor Affine Short Rate Model	185
C.4	An Econometric FX-like Model	187
