I	ORTHOMODULARITY	9
1	Papers presented at the meeting	11
1.1	Decomposition of orthogonal matrices over fields of power series	13
1.1.1	Introduction	13
1.1.2	Orthogonal matrices and isometries	13
1.1.3	Orthogonal decompositions	17
1.1.4	An algorithm to compute the decomposition	21
1.1.5	An outlook	26
2	Concerning the research made on the subject during the past decade	27
2.1	A very short introduction by R. Moresi	29
2.2	A short report by Hans A. Keller	29
II	LATTICES	31
3	Papers presented at the meeting	33
3.1	On a pair of totally isotropic subspaces	35
3.1.1	Introduction	35
3.1.2	Basic Concepts	36
3.1.3	Some reduction steps	37
3.1.4	The IHL L	39
3.1.5	Implementations	40
3.1.6	Diagrams	41
3.2	On a class of even subspaces in odd spaces	47
3.2.1	Introduction	47
3.2.2	The abstract setting of IHL	47
3.2.3	Implementations	48
3.2.4	Diagrams	51
3.3	On even Hermitean lattices	55
3.3.1	Introduction	55
3.3.2	Preliminaries	55
3.3.3	Insight into $[a^+t_1^\pm, a^+]$	56
3.3.4	Insight into $[r_4, d]$	58
3.3.5	Insight into $[a^+t_2^\pm, a^+]$, $[a^+t_4^\pm, a^+t_2^\pm]$, $[d^\pm, a^+t_4^\pm]$ and $[d, d^\pm]$	59
3.3.6	An alternative insight into $[d, a^+t_4^\pm]$	60

3.3.7	Two special cases concerning particular even elements	61
3.3.8	Concluding remarks	62
3.3.9	Diagrams	64
4	Concerning the research made on the subject during the past decade	83
4.1	A brief introduction by R. Moresi	85
4.2	A brief report by R. Moresi	85
4.3	On rigid Hermitean lattices, I	87
4.3.1	Introduction	87
4.3.2	Preliminaries	87
4.3.3	Description of S and F_1	88
4.3.4	Applications	90
4.3.5	Diagrams	90
4.4	Visual representations of Takeuchi's lattice	93
4.4.1	Introduction	93
4.4.2	The complete diagram of $FM(1, 2, 1)$	94
4.4.3	The first crucial sublattice	95
4.4.4	The second crucial sublattice	96
4.4.5	The second crucial sublattice: prime quotients	97
4.4.6	The first crucial sublattice: prime quotients	98
4.4.7	The ideal (z)	99
	Bibliography	101
