<b>Acknowledgements</b> .....	<b>i</b>
<b>Contents</b> .....	<b>iii</b>
<b>Zusammenfassung</b> .....	<b>vii</b>
<b>Summary</b> .....	<b>xi</b>
<b>Nomenclature</b> .....	<b>xv</b>
Abbreviations .....	xv
Symbols .....	xvi
Greek letters.....	xvii
Subscripts .....	xviii
Superscripts .....	xviii
<b>1. Introduction</b> .....	<b>1</b>
1.1 Inorganic nanoparticles from everyday life to biomedical applications .....	1
1.2 Flame aerosol synthesis of nanoparticles .....	2
1.3 <i>In vitro</i> evaluations of nanoparticle-cell interactions in nanotoxicology and nanomedicine.....	3
1.4 References .....	6
<b>2. The effect of settling on cytotoxicity evaluation of SiO<sub>2</sub> nanoparticles</b> .....	<b>11</b>
2.1 Introduction .....	12
2.2 Experimental .....	13
2.2.1 <i>Materials</i> .....	13
2.2.2 <i>SiO<sub>2</sub> characterization</i> .....	14
2.2.3 <i>Particle suspensions preparation and characterization</i> .....	14
2.2.4 <i>Particle settling</i> .....	16
2.2.5 <i>Endotoxin contamination assay</i> .....	17
2.2.6 <i>Cell growth</i> .....	17
2.2.7 <i>Cytotoxicity evaluation in standard upright cell culture configuration</i> .....	17
2.2.8 <i>Cytotoxicity evaluation in inverted vs. modified upright cell culture configuration</i> ...	18
2.2.9 <i>Effective density by volumetric centrifugation method (VCM)</i> .....	19
2.2.10 <i>Statistical analysis</i> .....	20

2.3	Agglomerate settling rate: Theory.....	20
2.4	Results and Discussion.....	21
2.4.1	Primary particle and agglomerate size and structure.....	21
2.4.2	Settled SiO <sub>2</sub> mass fraction and agglomerate settling rate.....	21
2.4.3	Cytotoxicity evaluation in upright cell cultures.....	25
2.4.4	Cytotoxicity evaluation in inverted cell cultures.....	27
2.5	Conclusions.....	31
2.6	Acknowledgements.....	31
2.7	Appendix.....	32
2.7.1	Settled SiO <sub>2</sub> fraction by gravitational sedimentation.....	32
2.8	References.....	41
<b>3.</b>	<b>Mobility and settling rate of agglomerates of polydisperse nanoparticles.....</b>	<b>45</b>
3.1	Introduction.....	46
3.2	Theory.....	47
3.2.1	Brownian Dynamics (BD) method.....	47
3.2.2	Fractal-like agglomerate generation method and properties.....	49
3.3	Experimental.....	52
3.4	Results and Discussion.....	53
3.4.1	Validation.....	53
3.4.2	Mobility diameter of fractal-like agglomerates.....	55
3.4.3	Settling rate of fractal-like agglomerates.....	61
3.4.4	Comparison with experiments.....	67
3.5	Conclusions.....	73
3.6	Appendix.....	74
3.6.1	The Cartesian rotation vector $a$ and expressions for $\Omega^a$ , $\Xi^a$ and $\mathbf{F}_{\text{metric}}^a$ .....	74
3.6.2	Implementation.....	75
3.6.3	Gyration tensor and relative shape anisotropy.....	78
3.6.4	Validation of rotational motion.....	79
3.6.5	Comparison with settling measurements in biological media.....	92
3.7	References.....	95
<b>4.</b>	<b>Quantitative analysis of the deposited nanoparticle dose on cell cultures by optical absorption spectroscopy.....</b>	<b>99</b>
4.1	Introduction.....	100
4.2	Experimental.....	102
4.2.1	Materials.....	102
4.2.2	Nanoparticle production.....	102

4.2.3	Nanoparticle characterization.....	102
4.2.4	Particle suspensions preparation and characterization.....	103
4.2.5	Particle settling.....	103
4.2.6	ZnO dissolution.....	103
4.2.7	Cell growth and viability assay.....	104
4.2.8	TEM cell analysis.....	105
4.3	Results and Discussion.....	106
4.3.1	Nanoparticle characterization.....	106
4.3.2	Cytotoxicity evaluation.....	108
4.3.3	Nanoparticle cytotoxicity: Comparison with other studies.....	110
4.3.4	ZnO dissolution dictates cytotoxicity.....	111
4.3.5	Deposited nanoparticle mass fraction and cytotoxicity in serum-free medium.....	111
4.3.6	Influence of serum.....	118
4.4	Conclusions.....	122
4.5	Acknowledgements.....	122
4.6	Appendix.....	123
4.7	References.....	131
<b>5.</b>	<b>The silanol content and <i>in vitro</i> cytolytic activity of flame-made silica.....</b>	<b>135</b>
5.1	Introduction.....	136
5.2	Experimental.....	137
5.2.1	Materials.....	137
5.2.2	Nanoparticle production.....	138
5.2.3	Nanoparticle characterization.....	139
5.2.4	SiO <sub>2</sub> suspensions preparation and <i>in vitro</i> cell studies.....	141
5.3	Results and Discussion.....	142
5.3.1	Particle specific surface area and morphology.....	142
5.3.2	Raman and infrared spectroscopy.....	146
5.3.3	Thermogravimetric analysis (TGA).....	150
5.3.4	Silanol content.....	152
5.3.5	<i>In vitro</i> cytolytic activity.....	155
5.4	Conclusions.....	158
5.5	Acknowledgements.....	158
5.6	References.....	159
<b>6.</b>	<b>Concluding remarks and Research recommendations.....</b>	<b>163</b>
6.1	References.....	164

<b>Appendix A: Raman spectra of commercial fumed SiO<sub>2</sub> nanoparticles</b> .....	<b>165</b>
A.1 Shift correction, normalization and averaging .....	165
A.2 Raman spectra .....	166
<b>Appendix B: Brownian Dynamics FORTRAN code for Chapter 3</b> .....	<b>167</b>
<b>Appendix C: Near-UV activated, photostable nanophosphors for <i>in vitro</i> dosimetry and dynamic bioimaging</b> .....	<b>203</b>
C.1 Introduction .....	204
C.2 Experimental .....	205
C.2.1 <i>Materials</i> .....	205
C.2.2 <i>Nanoparticle production</i> .....	205
C.2.3 <i>Nanoparticle characterization</i> .....	206
C.2.4 <i>Particle suspensions preparation and characterization</i> .....	206
C.2.5 <i>Particle settling</i> .....	207
C.2.6 <i>Cell growth</i> .....	207
C.2.7 <i>In vitro dosimetry by fluorescence microscopy</i> .....	207
C.2.8 <i>Dynamic bioimaging</i> .....	208
C.2.9 <i>Cytotoxicity evaluation</i> .....	208
C.3 Results and Discussion.....	209
C.3.1 <i>Composition</i> .....	209
C.3.2 <i>Excitation–Emission</i> .....	210
C.3.3 <i>Bioimaging</i> .....	213
C.4 Conclusions .....	218
C.5 Appendix .....	219
C.6 References .....	222
Curriculum Vitae .....	225
Publications and Presentations .....	227
